FIRST LIST OF BASIC PAIRS

MAGNETIC PAIR	NUMBER
Achilles-Achilles	13
Adductor-Adductor	1
Adrenal-Adrenal	273
Adrenal-All the front	274
Adrenal-Lung	271
Adrenal-Rectum	272
Angina-Angina	3
Angle-Angle	4
Annex-Anus	2
Antecuerdo-Antecuerdo	7
Anus-Anus	5
Anus-Testicle	6
Aortic knob-Pericardium	25
Appendix-Femur head	8
Appendix-Left tongue	9
Appendix-Pleura	10
Appendix-Right testicle	11
Appendix-Thymus	12
Armpit-Armpit	18
Ascending colon-Descending colon	63
Ascending colon-Left kidney	66
Ascending colon-Liver	64
Ascending colon-Right kidney	65
Atlas-Atlas	16
Atlas-Pylorus	17
Atrioventricular sinus-Left kidney	259
Back-Back	106
Big toe-Big toe	98
Bladder-Bladder	310
Brachial-Brachial	26
Bursa-Bursa	33
Bursa-Elbow	315
Buttock-Buttock	129
Buttock-Pylorus	131
Calcaneus-Calcaneus	38
Canthus-Canthus	40
Cardias-Adrenal	44
Cardias-Esophagus	43
Cardias-Vagina/Testicle	45
Carina-Carina	46
Carotid-Carotid	47
Cava-Cava	48
CBD-Right kidney	78
Cecum-Cecum	56
Cecum-Right Kidney	57
Central sulcus-Central sulcus	58
Cerebellum-Cerebellum	50
Cerebellum-Medulla	49
Cervical 1-Pylorus	233
Cervical 1-Pylory	52

MAGNETIC PAIR	NUMBER
Cervical 3-Supraspinatus	53
Cervical plexus-Cervical plexus	226
Cervical-Sacrum	51
Cheekbone-Kidney	229
Chiasma-Chiasma	240
Chin-Chin	178
Chondral-Chondral	76
Circle of Willis-Circle of Willis	227
Clitoris-Clitoris/Pelvis	60
Coccyx-Coccyx	90
Commissure-Commissure	75
Contra cecum-Contra cecum	79
Coronary-Left lung	84
Corpora cavernosa-Corpora cavernosa	97
Costal-Costal	85
Costodiaphragmatic-Costodiaphragmatic	88
Costohepatic-Costohepatic	89
Cranial-Cranial	91
Deltoids-Deltoids	99
Deltoids-Right kidney	100
Dental-Kidney	101
Descending colon-Descending colon	67
Descending colon-Left kidney	70
Descending colon-Liver	68
Descending colon-Rectum	69
Diaphragm-Diaphragm	102
Diaphragm-Esophagus	316
Diaphragm-Homolateral kidney	103
Dorsal 2-Dorsal 2	104
Dorsal 5-Lumbar	107
Dorsal 6-Dorsal 6	105
Douglas' pouch-Femoral vein	257
Duodenum-Duodenum	108
Duodenum-Left kidney	111
Duodenum-Liver	109
Duodenum-Right kidney	110
Ear-Kidney	190
Elbow-Elbow	61
Epigastrium-Epigastrium	112
Esophagus-Esophagus	115
Esophagus-Left bladder	117
Esophagus-Pylorus	116
Eye-Eye	192
Eye-Scapula	191
Eyid-Eyelid	207
Fallopian tube-Fallopian tube	299
Fallopian tube-Ovary	298
Femoral nerve-Femoral nerve	183
Flank-Flank	128
Frontal sinus-Frontal sinus	260

FIRST LIST OF BASIC PAIRS

MAGNETIC PAIR	NUMBER
Gallbladder-Gallbladder	312
Gallbladder-Right kidney	311
Glabella- Medulla	156
Glabella-Kidney	158
Glabella-Sacrum	157
Greater trochanter- Contralateral kidney	295
Greater trochanter-Greater trochanter	296
Heart-Bladder	83
Heart-Heart	80
Heart-Homolateral rib	81
Heart-Pancreas	82
Hepatic-Retro hepatic	132
Hiatus-Esophagus	133
Hiatus-Right testicle	135
Hiatus-Right testicle	136
Hiatus-Tongue	134
Hip-Hip	37
Humerus-Humerus	151
Hypophysis-Adrenal	146
Hypophysis-Bladder	148
Hypophysis-Hypophysis	144
Hypophysis-Medulla	143
Hypophysis-Ovary	145
Hypophysis-Thyroid	317
Hypophysis-Thyroids	147
Ileocecal valve-Right kidney	309
Iliac crest-Iliac crest	92
Iliac-Iliac	152
Index finger-Index finger	153
Infra axillary-Infra axillary	154
Inguinal nerve-Inguinal nerve	186
Inguinal nerve-Joint	184
Inguinal nerve-Liver	185
Inner ear-Inner ear	189
Internal ligament-Malleolus	166
Ischial ramus-Ischial ramus	242
Ischium- Ischium	159
Kidney- Posterior lobe of the liver	247
Kidney-Cheekbone	248
Kidney-Kidney	249
Kidney-Renal capsule	246
Kidney-Sacrum	250
Kidney-Temporal	253
Kidney-Ureter	255
Lacrimonal-Lacrimonal	160
Larynx-Larynx	161
Last cervical-Dorsal 1	54
Lateral sulcus-Lateral sulcus	59
Latissimus- Latissimus	162
Left buttock-Left achilles	130

MAGNETIC PAIR	NUMBER
Left kidney-Left eye	251
Left kidney-Thyroid	254
Left pectoral-Quadriceps tendon	209
Left temporal-Left temporal	278
Left tongue-Heart	164
Lesser trochanter-Lesser trochanter	297
Light pleura-Liver	223
Liver ligament-Right kidney	165
Liver-Descending colon	137
Liver-Heart	138
Liver-Left kidney	142
Liver-Liver	139
Liver-Medulla	318
Liver-Occipital prominence	140
Liver-Right kidney	141
Lobe-Lobe	228
Lower tibia-Lower tibia	283
Lumbar 4-Lumbar 4	167
Lung-Heart	238
Mandible-Mandible	171
Mastoid-Mastoid	175
Mediastinum-Mediastinum	176
Medulla-Bladder	32
Medulla-Cerebellum	314
Medulla-Heart	29
Medulla-Medulla	28
Medulla-Thyroids	30
Medulla-Thyroids	31
Mole-Kidney	168
Nape-Sacrum	187
Nasal cavity-Nasal cavity	261
Navel-Navel	193
Navel-Testicle	194
Navel-Uterus	195
Neck-Neck	96
Nose-Nose	182
Occipital-Occipital	188
Omentum-Omentum	113
Orbital floor-Orbital floor	222
Outer ear-Outer ear	196
Ovary-Ovary	197
Painful articulation-Homolateral kidney	15
Palm-Palm	319
Pancreas duct-Left kidney	77
Pancreas head-Adrenal	36
Pancreas head-Liver	34
Pancreas head-Pancreas	35
Pancreas tail-Liver	62
Pancreas tip-Spleen	239
Pancreas-Pancreas	199

FIRST LIST OF BASIC PAIRS

MAGNETIC PAIR	NUMBER
Pancreas-Stomach	198
Parathyroid-Parathyroid	200
Paravertebral-Paravertebral	201
Parietal- Contralateral kidney	205
Parietal-Medulla	202
Parietal-Parietal	204
Parietal-Transverse colon	203
Parotid-Parotid	206
Patella-Patella	256
Pericardium-Pericardium	210
Perihepatic-Perihepatic	211
Peritoneum-Pleura	212
Pineal-Medulla	218
Pineal-Pancreas	219
Pineal-Pineal	220
Pineal-Prostate/Uterus	221
Pleura-Pleura	225
Popliteal-Popliteal	230
Post pineal-Bladder	234
Post pineal-Post pineal	231
Preauricular-Preauricular	232
Prostate-Prostate	235
Prostate-Prostate	313
Prostate-Rectum	236
Pudendal-Pudendal	237
Pylorus-Anus	213
Pylorus-Left kidney	216
Pylorus-Liver	214
Pylorus-Pylorus	215
Pylorus-Ureter	217
Quadratus lumborum-Quadratus lumborum	93
Quadriceps-Quadriceps	94
Radius-Radius	241
Ramus-Ramus (of mandible)	243
Rectum-Rectum	244
Renal calyx-Ureter	39
Renal capsule-Bladder	42
Renal capsule-Renal capsule	41
Retro mastoid-Retro mastoid	245
Rib 1-Rib 1	87
Right bronchus-Cerebellum	27
Right costal-Liver	86
Right inguinal-Posterior iliac spine	155
Right mastoid-Heart	173
Right mastoid-Hypophysis	174
Right pectoral-Quadriceps tendon	208
Right pleura-Peritoneum	224
Right temple-Heart	262
Right temporal-Left temporal	277
Right temporal-Right temporal	275

MAGNETIC PAIR	NUMBER
Right temporal-Right temporal	276
Right triceps tendon-Right achilles	279
Sacrum-Sacrum	258
Scapula-Scapula	114
Sciatic-Sciatic	55
Sigmoid-Rectum	264
Spleen-Duodenum	20
Spleen-Hypothalamus	22
Spleen-Liver	21
Spleen-Lung	23
Spleen-Pancreas tip	24
Spleen-Spleen	19
Sternocleidomastoid-Sternocleidomastoid	118
Sternum handle-Sternum handle	172
Sternum-Adrenal	120
Sternum-Spleen	119
Stomach-Adrenal	127
Stomach-Heart	122
Stomach-Liver	124
Stomach-Pancreas tail	121
Stomach-Prostate	126
Stomach-Pylorus	125
Stomach-Stomach	123
Stump-Stump	181
Subclavian-Subclavian	265
Subdiaphragm- Subdiaphragm	266
Supraciliary-Medulla	267
Suprahepatic-Suprahepatic	269
Suprapubic-Suprapubic	270
Supraspinatus- Supraspinatus	268
Suprasternal notch-Left buttock	149
Temple-Temple	263
Tensor fasciae latae-Tensor fasciae latae	280
Testicle-Testicle	281
Thymus-Adrenal	291
Thymus-Hypophysis	287
Thymus-Liver	286
Thymus-Ovary	288
Thymus-Parietal	289
Thymus-Rectum	290
Thymus-Spleen	284
Thymus-Spleen	285
Thymus-Thymus	292
Thyroid bone-Thyroid bone	150
Thyroid-Thyroid	293
Tibia-Tibia	282
Tongue-Tongue	163
Trachea-Trachea	294
Transverse colon-Bladder	74
Transverse colon-Left kidney	71

FIRST LIST OF BASIC PAIRS

MAGNETIC PAIR	NUMBER
Transverse colon-Liver	73
Transverse colon-Transverse colon	72
Ulna-Ulna	95
Upper kidney-Lower kidney	252
Upper mediastinum-Lower mediastinum	177
Ureter-Ureter	300
Urethra-Urethra	301
Uterus-Kidney	304
Uterus-Ovary	302
Uterus-Rectum	303
Uterus-Uterus	305
Vagina-Throat	307
Vagina-Vagina	306
Vagus nerve- Contralateral kidney	308
Wrist-Lower tibia	180
Wrist-Wrist	179
Zygomatic arch-Zygomatic arch	14
Zygomatic bone-Contralateral kidney	170
Zygomatic bone-Zygomatic bone	169

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
1	Adductor-Adductor	SIMILAR SYMPTOMATOLOGY: HIV DNA. Virus (1) (False AIDS). Itching and stinging in the groin and genital area. Urethra, vagina, penis disorder. Distension of the abdomen, digestive disorders, rectal bleeding, mycosis, herpes, etc.	SP11 (Jimen): Incontinence and retention of urine, pain during urination.
2	Annex-Anus	SIMILAR SYMPTOMATOLOGY: Paramyxovirus. Virus . Itching, irritation and dryness of the sexual organs. Check Prostate-Rectum.	GV2 (Yaoshu): Amenorrhea, urethritis, pain in the spine and thighs, anal eczema, stiffness to bend, epilepsy.
3	Angina-Angina	SIMILAR SYMPTOMATOLOGY: Herpes 2. Virus . Facial paralysis, rheumatoid arthritis problems, canker sores or milkweed in the mouth. Change toothbrush, stomatitis, and scar by surgery.	ST5 (Daying): Trigeminal neuralgia, deviation of the mouth, goiter.
4	Angle-Angle	SIMILAR SYMPTOMATOLOGY: Streptococcus fragilis. Bacterium . Oral and laryngeal problems. Gingivitis, rhinitis, pharyngitis, loosening of the teeth, bleeding gums, periodontitis, bad breath, decay and loose teeth, ear symptoms, bruxism, pimples, peritoneal disease. By sexual transmission.	ST6 (Jiache): Facial paralysis, hemiplegia, trigeminal neuralgia, neck pain, anatomy of neck muscles, difficulty chewing.
5	Anus-Anus	SIMILAR SYMPTOMATOLOGY: Human papilloma. Virus . Hemorrhoids, genital warts. It produces fisheye on the bottom of the foot, prostatitis, uterus fibroids, and ulcers in the womb. By blood transfusion, by genital fluids, by anal sex, sexual abuse.	GV1 (Changqiang): Fear, epilepsy, rectal prolapse, urethritis, constipation, premature ejaculation, chronic hemorrhoids.
6	Anus-Testicle	SIMILAR SYMPTOMATOLOGY: Hemorrhoids associated with left vagus nerve.	GV2 (Yaoshu): Amenorrhea, urethritis, pain in the spine and thighs, anal eczema, stiffness to bend, epilepsy. CV2 (Qugu): Lack of energy (emptiness of the organs), sexual impotence, urethritis, spermatorrhea, endometritis, and irregular menstrual cycles.
7	Antecuernio-Antecuernio	SIMILAR SYMPTOMATOLOGY: Aerobacter Aerogenus. Bacterium . Respiratory and gastrointestinal problems.	ST8 (Touwei): Headaches (especially frontal headache), migraine, vertigo, cerebral congestion, purulent conjunctivitis, poor vision, facial paralysis.
8	Appendix-Femur head	SIMILAR SYMPTOMATOLOGY: Small pox vaccine. Virus . It simulates atopic dermatitis. Fever, intense cough. It causes exanthematous viral disease, SARS (Severe Acute Respiratory Syndrome) if it is associated with a fungus. Irritation of the skin.	SP13 (Fushe): Colitis, intestinal spasms, constipation, indigestion, abdominal tumors, hepatitis.
9	Appendix-Left tongue	SIMILAR SYMPTOMATOLOGY: Smallpox. Virus . Atopic dermatitis. If it is associated with a bacterium, it can generate flat warts. It is confused with acne, cold sores, urethritis, vaginitis, penile problems. Fever, malaise. Headache.	SP13 (Fushe): Colitis, intestinal spasms, constipation, indigestion, abdominal tumors, hepatitis. ST4 (Dicang): Difficulty swallowing, trigeminal neuralgia, eyelid tics. Deviation of the mouth. Mutism.
10	Appendix-Pleura	SIMILAR SYMPTOMATOLOGY: Staphylococcus aureus. Bacterium . Problems in larynx, trachea and pleura. Appendicitis, false pneumonia, heart attack,	SP13 (Fushe): Colitis, intestinal spasms, constipation, indigestion, abdominal tumors, hepatitis. GB22 (Yuanye): General weakness, axillary adenopathy, and hydrocephalus.

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
		arrhythmia, tachycardia, retinopathy, conjunctivitis. Blood infection (septicemia).	
11	Appendix-Right testicle	SIMILAR SYMPTOMATOLOGY: Vaccinia. Virus. SARS (Severe Acute Respiratory Syndrome), fever, lung problems, severe cough, atopic dermatitis. It improves immune function.	GB28 (Weidao): Edema, nausea, vomiting, lack of appetite, anorexia, constipation, difficult menstrual cycles, cecum inflammation, and pain of the lower abdomen. CV2 (Qugu): Lack of energy (emptiness of the organs), sexual impotence, urethritis, spermatorrhea, endometritis, and irregular menstrual cycles.
12	Appendix-Thymus	SIMILAR SYMPTOMATOLOGY: Immunocompetence. Deficiency of the body's defenses. Deficiency of red blood cells. Sickly constitution. It improves the quality and production of white blood cells. It elevates lymphocytes Lymphatic system. Fatigue. It occurs in AIDS.	SP13 (Fushe): Colitis, intestinal spasms, constipation, indigestion, abdominal tumors, hepatitis. RV20 (Huagai): Cough, dyspnea, hiccups, vomiting, bronchitis, mastitis, nocturnal asthma.
13	Achilles-Achilles	SIMILAR SYMPTOMATOLOGY: Shigella. Bacterium. Severe headache with fever, malaise. Headaches. Severe influenza, atypical pneumonia. Lupus. Digestive disorders: flatulence, diarrhea, mycosis, bleeding from the digestive tract, gas; rectum and anus. Abdominal distention from the navel downwards.	BL59 (Fuyang): General weakness, facial paralysis. Lumbosciatica, pain in the leg. Pain in area.
14	Zygomatic arch-Zygomatic arch	SIMILAR SYMPTOMATOLOGY: Cysticercus. Parasite. Neurocysticercosis. It affects CNS. Seizures, false epilepsy. For poorly cooked pork and traditionally raised, bad hygiene. Inflammation of nerves and lymphatic vessels.	ST3 (Juliao): Eye infections such as conjunctivitis, keratitis. Facial paralysis, trigeminal neuralgia, stuttering, tonsillitis, torticollis, acne, glaucoma, rhinitis, and eyelid tics.
15	Painful articulation-Homolateral kidney	SIMILAR SYMPTOMATOLOGY: Temporary. Useful in physical, chemical or psychological traumatism. Chronic osteoarthritis Articulations pain.	BL23 (Shenshu): Kidney settlement. It protects the kidney and regulates menstrual flow. It mobilizes and eliminates water. Disorders of male sexual dysfunction, irregular menstruation, urinary incontinence, and low back pain. BL52 (Zhishi): Knee pain. It clears and mobilizes moisture and heat (eliminating them), infection in the urinary tract. Low back pain.
16	Atlas-Atlas	SIMILAR SYMPTOMATOLOGY: JUANA. Special. Sexual aspect, frigidity (lack of sexual emotion), nymphomania (excess of sexual appetite). It regulates both excess and lack of libido.	GV15 (Yamen): Sudden loss of voice, epilepsy, rigidity of the tongue, unable to speak, epistaxis, headaches, psychosis, stiff neck, pharyngitis.
17	Atlas-Pylorus	SIMILAR SYMPTOMATOLOGY: Plasmodium falciparum. Parasite. It causes malaria, fever, chills, sweating, headache, fibromyalgia, joint pain.	GV15 (Yamen): It clears out the brain and awakens the senses. Sudden aphonia, deaf-mutism, epilepsy. SP16 (Fuai): It strengthens the spleen and eliminates indigestion. Acute and chronic dysentery. Constipation.
18	Armpit-Armpit	SIMILAR SYMPTOMATOLOGY: Rabies. Virus. Change toothbrush. Laryngitis, conjunctivitis, photophobia, maculopathies,	HE1 (Jiquan): It orders energy and expands the chest. Palpitations, cardiac functional diseases, intercostal pain,

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
		retinitis pigmentosa, bronchitis, asthma, respiratory failure, chronic otitis, chronic sinusitis, problems in the CNS, alterations in thyroid, parathyroid and parotid, headaches, nervous irritability, nervousness, derangement, bad character, crisis of panic.	circulatory disorders of the arm and hand. Cold in the elbow.
19	Spleen-Spleen	SIMILAR SYMPTOMATOLOGY: Yersinia Pestis. Bacterium. Spleen dysfunction, platelet dysfunction, anemia, bronchitis laryngeal cough, vaginal discharge, azoospermia in man, apparent leukemia, cold, inflammation of the spleen. For rodents and fleas.	LV14 (Qimen): It decongests the liver and spleen, and harmonizes the stomach. Liver diseases, inflammation of the spleen. Abdominal distention, diseases after childbirth.
20	Spleen-Duodenum	SIMILAR SYMPTOMATOLOGY: Leukemia. It is confused with brucellosis (for skin wounds, consumption of unpasteurized dairy products and dairy products, undercooked meat, by occupation), lung problems, marrow disorders, anemia, scoliosis, weakness, lack of strength, pain or bone sensitivity, and irregularity in menstrual cycles.	LV13 (Zhangmen): Low back pain, pain in the extremities and pain in the chest, cough, dyspnea, vomiting and anguish. Inflammation of the liver and spleen. It eliminates feeling of tension. LV14 (Qimen): It decongests the liver and spleen, and harmonizes the stomach. Liver diseases, inflammation of the spleen. Abdominal distention, diseases after childbirth.
21	Spleen-Liver	SIMILAR SYMPTOMATOLOGY: Brucella. Bacterium. For dairy products. Pain in the sacrum, hip. Arthritis. Night sweats. Inflammation of the ganglia. Pulmonary, respiratory and liver problems. Drowsiness and overweight.	LV14 (Qimen): It decongests the liver and spleen, and harmonizes the stomach. Liver diseases, inflammation of the spleen. Abdominal distention, diseases after childbirth.
22	Spleen-Hypothalamus	SIMILAR SYMPTOMATOLOGY: Emotional. Laziness.	LV14 (Qimen): It decongests the liver and spleen, and harmonizes the stomach. Liver diseases, inflammation of the spleen. Abdominal distention, diseases after childbirth. GV24 (Shenting): Eye inflammations, insomnia, rhinitis, headaches, psychosomatic and psychosomatic disorders, neurasthenia.
23	Spleen-Lung	SIMILAR SYMPTOMATOLOGY: Bacteria Reservoir. Damaged teeth.	LV14 (Qimen): It decongests the liver and spleen, and harmonizes the stomach. Liver diseases, inflammation of the spleen. Abdominal distention, diseases after childbirth. BL42 (Pohu): It calms cough, dyspnea, acute and chronic bronchitis. Bronchial asthma.
24	Spleen-Pancreas tip	SIMILAR SYMPTOMATOLOGY: Virus. Common wart. It may come out all over the body and may dry out over time.	LV14 (Qimen): It decongests the liver and spleen, and harmonizes the stomach. Liver diseases, inflammation of the spleen. Abdominal distention, diseases after childbirth. LV13 (Zhangmen): Lack of energy. Low back pain, pain in the extremities and pain in the chest, cough, dyspnea, vomiting and anguish. Meteorism with intense radiated pain, vomiting and anguish.

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
25	Aortic knob-Pericardium	SIMILAR SYMPTOMATOLOGY: Special. Arterial hypertension.	ST18 (Rugen): Cough with dyspnea. Chest pain, cold extremities, mastitis, bulimia. Milk production. ST15 (Wuyi): Cough with dyspnea and expectoration. Chest pain. It cleans up the lung and clears heat. Infectious diseases of the respiratory tract.
26	Brachial-Brachial	SIMILAR SYMPTOMATOLOGY: Streptococcus A. Bacterium. Elbow pains, dryness. Skin problems (melanoma), dermatitis, scaling. It may cause heart or lung problems. Articular pain, it is confused with scabies and with pityriasis versicolor. Dry mouth. Emotional, cold and clumsy hands.	LU5 (Chize): Cough, dyspnea, sadness, depression, stiffness and contracture of the elbow, shingles, pruritus on the skin, and sore throat. HE3 (Shaohai): It calms down the heart, manic-depressive disorders, amnesia, loss of memory, pains in the heart region.
27	Right bronchus-Cerebellum	SIMILAR SYMPTOMATOLOGY: Emotional. Fear of going crazy, losing your mind. Dizziness, lack of balance. Aggressive behavior.	KI24 (Lingxu): Acute and chronic dysfunctions of the lung and lower respiratory system, pain and tightness in the chest. BL10 (Tianzhu): Painful alteration of the region covering the head, neck and shoulder. Vertigo, painful alteration of the lumbar region.
28	Medulla-Medulla	SIMILAR SYMPTOMATOLOGY: Special. Alzheimer. Eyes pain with tearing, neck and shoulder pain, anosmia, nasal obstruction. It has effect on parasympathetic.	BL10 (Tianzhu): Painful alteration of the region covering the head, neck and shoulder. Vertigo, painful alteration of the lumbar region.
29	Medulla-Heart	SIMILAR SYMPTOMATOLOGY: Emotional. Cruelty, psychotic reaction, lacking contact with reality and retreating in oneself. Unusual and strange behavior. Feelings of guilt, frustration and depression. It helps to control bradycardia.	BL10 (Tianzhu): Painful alteration of the region covering the head, neck and shoulder. Vertigo, painful alteration of the lumbar region. ST16 (Yingchuan): It reduces cough and relieves dyspnea. Respiratory diseases, mastitis. Insomnia, pulmonary congestion.
30	Medulla-Thyroids	SIMILAR SYMPTOMATOLOGY: Meningitis. Virus. Progressive loss of hearing. Flu symptoms. Sore throat and head. Vomiting. Photophobia. Injuries in the lower spinal cord producing flaccidity, hypertrophy, muscle weakness, disability. It simulates multiple sclerosis. Root lumbar pain.	BL10 (Tianzhu): Painful alteration of the region covering the head, neck and shoulder. Vertigo, painful alteration of the lumbar region. CV22 (Tiantu): Hoarseness. Abscess in tonsils. Pharyngitis, laryngitis, asthma, dyspnea, all kinds of coughs.
31	Medulla-Thyroids	SIMILAR SYMPTOMATOLOGY: Injuries in the lower spinal cord producing flaccid virus, hypotrophy, weakness, disability.	BL10 (Tianzhu): Painful alteration of the region covering the head, neck and shoulder. Vertigo, painful alteration of the lumbar region. GV15 (Yamen): It clears out the brain and awakens the senses. Sudden aphonia, deaf-mutism, epilepsy. CV23 (Lianquan): Speech disorders, chronic myofascial pain, dysphagia, and hyper-salivation.
32	Medulla-Bladder	SIMILAR SYMPTOMATOLOGY: Dengue hemorrhagic. Virus. Respiratory disorders. They secrete large amounts of mucoproteins. When you impact this point the person may feel nauseated or vomiting or pain. Nasal bleeding, severe headache, muscle and joint pain. By mosquito bite.	BL10 (Tianzhu): Painful alteration of the region covering the head, neck and shoulder. Vertigo, painful alteration of the lumbar region. CV3 (Zhongji): Exhaustion, urinary incontinence, male sterility, vulvar pruritus,

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
			uterine prolapse, prostatitis, amenorrhea, leucorrhoea, deviations from the uterus.
33	Bursa-Bursa	SIMILAR SYMPTOMATOLOGY: Actinomyces. Fungus. It affects the shoulder, shoulder and neck stiffness, frozen shoulder, bursitis. Syndrome of the rotated cuff. Manifestations in the mouth, throat and neck. It affects arms. Bad axillary smell.	PC2: (Tianquan): Rheumatic disorders of the arm. Palpitations, eyestrain, nausea.
34	Pancreas head-Liver	SIMILAR SYMPTOMATOLOGY: Staphylococcus aureus coagulase. Bacterium. Hepatitis K, diarrhea, nausea and vomiting, migraine, arthritis. Autoimmune for liver malfunction, fatigue, pruritus, anorexia, abdominal pain, jaundice.	LV14 (Qimen): It decongests the liver and spleen, and harmonizes the stomach. Liver diseases, inflammation of the spleen. Abdominal distention, diseases after childbirth. CV10 (Xiawan): It strengthens the spleen, harmonizes the stomach, calms nausea and diarrhea, acute and chronic gastroenteritis, and hiccups.
35	Pancreas head-Pancreas	SIMILAR SYMPTOMATOLOGY: Ramses. Special. Heavy metal poisoning (mercury, lead, bismuth). By ingestion, inhalation, absorption of any of the toxic heavy metals, soft drinks, seafood, canned, paints, Teflon, dyes, tattoos, etc. Neurosis for toxins. It affects the CNS.	SP15 (Daheng): Abundant perspiration, paralysis of all four limbs, dysentery, and influenza.
36	Pancreas head-Adrenal	SIMILAR SYMPTOMATOLOGY: Staphylococcus aureus coagulase. Bacterium. It simulates diabetes due to an enzymatic alteration, gastroesophageal reflux (frequent in children), halitosis, in adults it may be a cause of pancreatic head CA. It causes colic, food intolerance, and gluten, dairy. It is confused with hiatal hernia or appendicitis. It simulates gastroduodenal ulcer and pneumonia.	CV10 (Xiawan): Meeting point of SP, meteorism, lack of appetite, anorexia. Calms nausea and diarrhea, acute and chronic gastroenteritis, hiccups, diarrhea with digestive disorders. GV8 (Jinsuo): It calms down the spiritual strength, eliminates spasms, psychic and psychosomatic disorders, fever, sedative and antispasmodic action.
37	Hip-Hip	SIMILAR SYMPTOMATOLOGY: Chlamydomphila pneumoniae. Bacterium. It affects the coagulation systems and produces bleeding. It simulates pneumonia. In women, it causes vaginal discharge and bleeding. Hemorrhoids, fissures, diverticula. Low back pain. Pterygium.	GB30 (Huantiao): Meeting point with meridian of the bladder. Flaccidity in legs, back pain, pain in muscles and knees, sciatica, joint pain in the hip, thigh and calves. Action on parathyroid.
38	Calcaneus-Calcaneus	SIMILAR SYMPTOMATOLOGY: Rickettsia. Bacterium. Muscle and joint weakness, aerosol infections, bites, stings, pet scratches and food. Skin problems, from cold sores to genital herpes. By fleas, dogs or cats.	BL61 (Pucan): Leg weakness, gonorrhea, arthritis of the knee, paralysis of the ankle and foot, cramps.
39	Renal calyx-Ureter	SIMILAR SYMPTOMATOLOGY: Herpes V. Virus. Renal colic. It promotes uremic syndrome or acute or chronic renal failure. Urinary and genital problems.	BL52 (Zhishi): Knee pain, cramps in the calves, urinary retention. It protects the kidney and strengthens essence. It clears and mobilizes moisture and heat (eliminates them). Disorders of male sexual function. Urinary tract infection. Low back pain. ST28 (Suidao): Anuria, spasms and uterine pains. Sterility. Pain in the back,

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
			shoulders and lower back. Cystitis, nephritis, rectal prolapse.
40	Canthus-Canthus	SIMILAR SYMPTOMATOLOGY: Aspergillus Fungus . Cataracts. When combined with others it can give dangerous ophthalmic diseases. It can affect the optic nerve, mycosis of the scalp. For excessive cleaning of cerumen, use of hearing devices such as headphones, for very humid places. It attacks nails and outer ear. Glaucoma. Blurred, tunnel vision.	GB1 (Tongziliao): Eye problems. It improves visual acuity. Meeting point of <i>Sanjiao</i> and small intestine. Headaches, diseases of the face, trigeminal neuralgia.
41	Renal capsule-Renal capsule	SIMILAR SYMPTOMATOLOGY: Proteus mirabilis. Bacterium . It simulates pneumonia, systemic lupus erythematosus. Renal and skin alterations such as thick, scaly, reddish spots, it also affects collagen. It makes alkaline urine that might smell like fish, kidney stones. It may cause wounds to become infected.	BL50 (Weicang): It harmonizes the stomach and stimulates the digestion process. Acute gastroenteritis and digestive disorders.
42	Renal capsule-Bladder	SIMILAR SYMPTOMATOLOGY: Special. Toxins in the kidney. When the kidney cannot eliminate toxins, they return to the bloodstream and may cause hypertension, arteriosclerosis, vomits, kidney stones and uric acid.	BL50 (Weicang): It harmonizes the stomach and stimulates the digestion process. Acute gastroenteritis and digestive disorders. CV3 (Zhongji): Meeting point with SP, KI, LV. Exhaustion, urinary incontinence, male sterility, vulvar pruritus, uterine prolapse, prostatitis, deviations of the uterus, amenorrhea, leucorrhoea.
43	Cardias-Esophagus	SIMILAR SYMPTOMATOLOGY: Special. Pulmonary problems, esophageal varices, difficulty to swallow liquids, belching with pain in the chest.	BL50 (Weicang): It harmonizes the stomach and stimulates the digestion process. Acute gastroenteritis and digestive disorders. CV3 (Zhongji): Meeting point with SP, KI, LV. Exhaustion, urinary incontinence, male sterility, vulvar pruritus, uterine prolapse, prostatitis, deviations of the uterus, amenorrhea, leucorrhoea.
44	Cardias-Adrenal	SIMILAR SYMPTOMATOLOGY: Beta-hemolytic streptococcus. Bacterium . Gastritis, food intolerance, halitosis, food obstruction, esophageal varices, joint pain. It simulates gastroduodenal ulcer and rheumatic fever, scarlet fever, psoriasis.	CV15 (Jiuwei): It releases spiritual energy and calms the heart, psychic and psychosomatic disorders. Mental weakness, fear, neurasthenia, asthma, restlessness, hiccups. It regulates fats. GV6 (Jizhong): Psychosis, spinal pain, rectal prolapse, jaundice, scoliosis, hemorrhoids and epilepsy.
45	Cardias-Vagina/Testicle	SIMILAR SYMPTOMATOLOGY: Special. Gastritis, ulcers. It alters sperm production. Food intolerance, poor digestion, burning in the stomach, diaphragmatic hernia.	CV15 (Jiuwei): It releases spiritual energy and calms the heart, psychic and psychosomatic disorders. Mental weakness, fear, neurasthenia, asthma, restlessness, hiccups. It regulates fats. CV2 (Qugu): Meeting point with KI. Lack of energy, impotence, urethritis, restlessness, hiccups. It regulates fats.
46	Carina-Carina	SIMILAR SYMPTOMATOLOGY: Aftosa. Virus . By consuming dairy products. (Remove them). Tracheal, bronchial, canker sores. It may withstand candidiasis. It affects	CV18 (Ren mai): Cough, dyspnea, asthma, vomiting, and bronchitis.

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
		pulmonary ventilation. Angina, rheumatism, laryngitis, dry skin and mucus. For dairy products. It simulates AIDS.	
47	Carotid-Carotid	SIMILAR SYMPTOMATOLOGY: MARIMAR. Special. It regulates systemic arterial hypertension. It regulates the obstruction and the blood flow.	LI18 (Futu): Torticollis, cough, asthma, dysphonia, laryngitis, tonsillitis, paralysis of the tongue, hypothyroidism.
48	Cava-Cava	SIMILAR SYMPTOMATOLOGY: Trichophyton. Fungus. Athlete's foot, headache and back pain, dry hair and split ends. Armpit, groins, bad smell on the feet, nail fungus and it makes them fragile. Mycotic vaginitis, ringworm in body and head.	BL43 (Gaohuangshu): Neck, shoulder, nape and back pain. It calms cough, dyspnea. Pulmonary infections. It relaxes tendons.
49	Cerebellum-Medulla	SIMILAR SYMPTOMATOLOGY: Newcastle. Virus. Cerebellar ataxia (incoordination of movements), vertigo, bird flu, sleep apnea, clumsy walking, wobble, respiratory, digestive and nervous problems, aggressive behavior, depression, migraines, excessive sweating, dizziness. By contact with birds and their excrement. For eating badly cooked chicken meat. It simulates Alzheimer's	GV17 (Naohu): Meeting point with BL. It exerts influence on the hypophysis. Brain problems that affect the bone marrow. Rigid and painful neck, insomnia. BL9 (Yuzhen): It improves visual acuity and clears the heat. Headache, eye pain, nasal obstruction.
50	Cerebellum-Cerebellum	SIMILAR SYMPTOMATOLOGY: CHAPINGO. Special. Bruxism (teeth grinding), glaucoma (liquid pressure in the eye that affects the lens and optic nerve), blurred vision, eye pain, blindness.	GV16 (Fengfu): Swollen tongue, deafness, hemiplegia, and epilepsy, all conditions of the head, torticollis, fear, blurred vision, hypertension, and kidney pain.
51	Cervical-Sacrum	SIMILAR SYMPTOMATOLOGY: It regulates the parasympathetic nervous system. Excess sweating, poor circulation, palpitations. Irritable colon. Headache in woman and neck pain in man. It regulates until the sixth and seventh lumbar. Dysfunction of the autonomic nervous system. Inflammation, heat, headache. Glands and viscera that regulate development, nutrition and reproduction. It promotes and maintains relaxation after digestion. Urination and sexual activity.	GV14 (Dazhui): Sudden loss of voice, epilepsy, rigidity of the tongue, unable to speak, epistaxis, headaches, psychosis, stiff neck, pharyngitis. GV3 (Yaoyangguan): Testicular insufficiency, leg contracture, nocturnal spermatorrhea.
52	Cervical 1-Pylory	SIMILAR SYMPTOMATOLOGY: Plasmodium falciparum. Parasite. Obstruction of larynx, fever and cough. It simulates malaria. It damages the brain. It simulates cysticercoid. Muscle aches, diarrhea, weakness, and anemia.	GV14 (Dazhui): Sudden loss of voice, epilepsy, rigidity of the tongue, unable to speak, epistaxis, headaches, psychosis, stiff neck, pharyngitis. SP16 (Fuai): It strengthens the spleen and eliminates indigestion. Acute and chronic dysentery. Constipation.
53	Cervical 3-Supraspinatus	SIMILAR SYMPTOMATOLOGY: Ballantidium typhus. Parasite. It creates a membrane that covers the bronchial walls causing respiratory failure, fluid retention and inflammation. It may cause necrosis and peritonitis. There is diarrhea with blood,	GV14 (Dazhui): High fever. It clears heat. It produces generalized sedation. Cold, flu, cervical syndrome. Epilepsy. GB21 (Jianjing): It clears heat, scatters wind, resolves edema and calms the pain. Mastitis. Shoulder and back pain.

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
		mucus and colic in the right colon. Typhoid fever. Strong headache, neck and cervical pain.	
54	Last cervical-Dorsal 1	SIMILAR SYMPTOMATOLOGY: PAISANO. Special. Tennis elbow, neck stiffness, bursitis, breast nodules, tendinitis.	GV14 (Dazhui): High fever. It clears heat. It produces generalized sedation. Cold, flu, cervical syndrome. Epilepsy. GV13 (Taodao): It clears heat and releases surface. Colds, flu.
55	Sciatic-Sciatic	SIMILAR SYMPTOMATOLOGY: Poliomyelitis. Virus. Muscle pain and spasm. It is confused with diabetic neuropathy, lumbago, sciatica. Pain in the head and throat for three weeks, muscle pain in the legs and stiff neck, tingling sensation. Nervous alteration. Pain in lower back.	BL37 (Yinmen): Bronchopulmonary diseases, torticollis, vomiting, paralysis of the legs, pain in the arm, shoulder and back.
56	Cecum-Cecum	SIMILAR SYMPTOMATOLOGY: Trichomonas vaginalis. Parasite. Bad digestion, gas, rectal or vaginal bleeding. It causes cellulitis, inguinal and lower limb pain. Digestive disorders, false diabetes. By sexual transmission, the male is asymptomatic carrier, in the woman may feel discomfort in sexual intercourse or when urinating. Yellowish and smelly flow. It lodges in the mouth and intestines. The treatment must be for the couple.	SP13 (Fushe): It regulates the intestine and the stomach. Bloating, edema, sensation of abdominal fullness, flatulence, external abdominal hernias, constipation, indigestion.
57	Cecum-Right Kidney	SIMILAR SYMPTOMATOLOGY: Trichomonas vaginalis. Parasite. Urinary tract infections, pneumonias, bleeding, colitis, poor digestion, visceral abscesses. For surgical wounds, in intensive care, premature, diabetic and alcoholic patients.	SP13 (Fushe): It regulates the intestine and the stomach. Bloating, edema, sensation of abdominal fullness, flatulence, external abdominal hernias, constipation, indigestion. BL23 (Shenshu): Kidney settlement. It protects the kidney and regulates menstrual flow. It mobilizes and eliminates water. Disorders of male sexual dysfunction, irregular menstruation, urinary incontinence, and low back pain.
58	Central sulcus-Central sulcus	SIMILAR SYMPTOMATOLOGY: RUEDA. Emotional. Haughtiness, demeanor, contempt, vanity.	GV23 (Shangxing): Nasal congestion, rhinitis, headaches, mental disorders, fevers. GV24 (Shenting): Nasal polyps, insomnia, epilepsy, eye inflammations, and rhinitis.
59	Lateral sulcus-Lateral sulcus	SIMILAR SYMPTOMATOLOGY: SOR JUANA. Emotional. Inspiration, sudden encouragement that favors creativity, is spontaneous, follows rituals or customs or habitual behaviors to encourage inspiration, such as aromatizing a space, travelling somewhere, praying, etc.	GB12 (Wangu): Point of union with BL and SI. Rheumatic disorders of the neck, hands and legs. Facial paralysis, insomnia, pharyngitis, atony of the orbicularis muscle of the lips, stiff neck.
60	Clitoris-Clitoris/Pelvis	SIMILAR SYMPTOMATOLOGY: Treponema spirochete. Bacterium. Ulcers and lesions on sexual organs, hives and rashes on hands and feet, fever, pain in the throat and joints, weight loss, hair loss, headaches, lack of appetite.	CV1 (Huiyin): Anuria (scanty or stops urine), weakness, hemorrhoids, anal itching. Liver, head, diseases of the genitals. Premature ejaculation.
61	Elbow-Elbow	SIMILAR SYMPTOMATOLOGY:	TB10 (Tianjing): Bronchitis, pharyngitis, neurasthenia, dementia, deafness,

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
		CASTAÑEDA. Special. Visual disorders, myopia, astigmatism, ocular dysfunction, cataracts.	neuralgia of the neck, neuralgia of the region. Vertebral, lumbar.
62	Pancreas tail-Liver	SIMILAR SYMPTOMATOLOGY: Clostridium botulinum. Bacterium. Poisoning caused by the ingestion of processed foods, canned goods, pickles, sausages and dairy products. Severe intestinal problems, muscle pain. Clostridiums cause metastases, they settle when there is a tumor. It is a highly poisonous toxin for the organism. It attacks the Central Nervous System.	SP16 (Fual): Abdominal pain, constipation, costal pain, dysentery, gastric ulcer, constipation. LV14 (Qimen): All post-partum infections. Febrile condition, chest pain, neurasthenia, stomachache, diarrhea, bloating, poor eye coordination, pleurisy, distention.
63	Ascending colon-Descending colon	SIMILAR SYMPTOMATOLOGY: Herpes zoster. Virus. Queen's girdle, genital herpes (very painful), ulcerations in intercostal spaces, digestive disorders, pain below the ribs, cold sores.	SP14 (Fujie): Local point to treat abdominal disorders; cough with dyspnea, heavy perspiration, diarrhea, weakness in the legs, and atony of genitals.
64	Ascending colon-Liver	SIMILAR SYMPTOMATOLOGY: Klebsiella pneumoniae. Bacterium. Pneumonia in debilitated people, fatigue in people with weakened immune system, urinary tract infections. Tiredness, nausea, loss of appetite, stomach pain, headache.	LV14 (Qimen): All post-partum infections. Febrile condition, chest pain, neurasthenia, stomachache, diarrhea, bloating, poor eye coordination, pleurisy, distention. SP14 (Fujie): Local point to treat abdominal disorders; cough with dyspnea, heavy perspiration, diarrhea, weakness in the legs, and atony of genitals.
65	Ascending colon-Right kidney	SIMILAR SYMPTOMATOLOGY: Klebsiella pneumoniae. Bacterium. It simulates pneumonia, produces mucus inside the lung, lung infection, colds, bronchial problems, asthma. It may cause erectile dysfunction.	BL23 (Shenshu): Kidney settlement. It protects the kidney and regulates menstrual flow. It mobilizes and eliminates water. Disorders of male sexual dysfunction, irregular menstruation, urinary incontinence, and low back pain. SP14 (Fujie): Local point to treat abdominal disorders; cough with dyspnea, heavy perspiration, diarrhea, weakness in the legs, and atony of genitals.
66	Ascending colon-Left kidney	SIMILAR SYMPTOMATOLOGY: Pasteurella. Bacterium. Cutaneous infections, mucus from the nose, inflammation of the throat and neck. For dogs and cats, for eating lamb meat, for changes of weather, cold, humidity, drafts.	BL23 (Shenshu): Kidney settlement. It protects the kidney and regulates menstrual flow. It mobilizes and eliminates water. Disorders of male sexual dysfunction, irregular menstruation, urinary incontinence, and low back pain. SP14 (Fujie): Local point to treat abdominal disorders; cough with dyspnea, heavy perspiration, diarrhea, weakness in the legs, and atony of genitals.
67	Descending colon-Descending colon	SIMILAR SYMPTOMATOLOGY: Enterobacter Cloacae. Bacterium. Digestive problems, gas, malabsorption. In the long term, it distends the descending colon and displaces it to the other side of the abdomen. Earthworms, hemorrhoids, low muscle volume, thinness. For dogs and cats mucus, lack of grooming in pets. For oxidized wine.	SP14 (Fujie): Local point to treat abdominal disorders; cough with dyspnea, heavy perspiration, diarrhea, weakness in the legs, and atony of genitals. SP12 (Chongmen): Local point to treat abdominal disorders; cough with dyspnea, heavy perspiration, diarrhea, weakness in the legs, and atony of genitals.
68	Descending colon-Liver	SIMILAR SYMPTOMATOLOGY: Hepatitis. Virus. Stomachache. Hepatitis A, drowsiness caused by the pancreas, fatigue.	SP13 (Fushe): It regulates the intestine and the stomach. Bloating, edema, sensation of abdominal fullness, flatulence,

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
		For pet feces, for water fountains, food, fruits and vegetables, diarrhea, headache.	external abdominal hernias, constipation, indigestion. LV14 (Qimen) : All post-partum infections. Febrile condition, chest pain, neurasthenia, stomachache, diarrhea, bloating, poor eye coordination, pleurisy, distention.
69	Descending colon-Rectum	SIMILAR SYMPTOMATOLOGY : OLAZO. Special . Intestinal obstruction, constipation, distension of the abdomen, without gas or evacuation. It releases the digestive tract when obstructed by neurological dysfunction. For inadequate food (excess) and stress.	SP14 (Fujie) : Local point to treat abdominal disorders; cough with dyspnea, heavy perspiration, diarrhea, weakness in the legs, and atony of genitals. GV2 (Yaoshu) : Pain in the spine and thighs, anal eczema, stiffness to bend, hemorrhoids, pain in the sacrum and coccyx.
70	Descending colon-Left kidney	SIMILAR SYMPTOMATOLOGY : Pasteurella. Bacterium . Constipation, digestive disorders, gas, mucus, bleeding from the digestive tract, unable to absorb proteins therefore loses weight. It causes cellulite. Infected wounds.	SP14 (Fujie) : Local point to treat abdominal disorders; cough with dyspnea, heavy perspiration, diarrhea, weakness in the legs, and atony of genitals. BL23 (Shenshu) : Kidney settlement. It protects the kidney and regulates menstrual flow. It mobilizes and eliminates water. Disorders of male sexual dysfunction, irregular menstruation, urinary incontinence, and low back pain.
71	Transverse colon-Left kidney	SIMILAR SYMPTOMATOLOGY : Giardia lamblia. Parasite . Gastroenteritis, diarrhea with mucus, gas, abdominal pain, malabsorption syndrome, anemia, anorexia.	CV7 (Yinjiao) : Connection point with KI, PC and TB. Vulvar itching, irregular menstrual cycles, nervous diseases, urine retention, psychosis, bloating, angina, abdominal spasms, hernia, fissured tongue. SP14 (Fujie) : Local point to treat abdominal disorders; cough with dyspnea, heavy perspiration, diarrhea, weakness in the legs, and atony of genitals.
72	Transverse colon-Transverse colon	SIMILAR SYMPTOMATOLOGY : Dysfunction . Alteration in the absorption of fats, mucosal colitis or irritable colon. The colon grows. Falling bladder. When the immune system is weak, it triggers an inflammatory reaction in the intestinal wall. There is inflammation when eating apples.	CV7 (Yinjiao) : Connection point with KI, PC and TB. Vulvar itching, irregular menstrual cycles, nervous diseases, urine retention, psychosis, bloating, angina, abdominal spasms, hernia, fissured tongue.
73	Transverse colon-Liver	SIMILAR SYMPTOMATOLOGY : Vibrio Cholerae. Bacterium . Cholera. Anorexia, stomach gas, bloating and possible bleeding, stomach pain (below the navel), headache, watery diarrhea, cold hands, muscle cramps, defects in the intestinal flora.	LV14 (Qimen) : All post-partum infections. Febrile condition, chest pain, neurasthenia, stomachache, diarrhea, bloating, poor eye coordination, pleurisy, distention.
74	Transverse colon-Bladder	SIMILAR SYMPTOMATOLOGY : Vibrio Cholerae. Bacterium . Cholera. Stomach pain, watery diarrhea with mucus, there is rapid dehydration, headache, abdominal distension, stomach gas, intolerance to fats. It simulates diabetes. Cramps, lumbar pain, urinary incontinence in children and adults. Anorexia. For contaminated water, fruits and vegetables poorly washed.	CV7 (Yinjiao) : Connection point with KI, PC and TB. Vulvar itching, irregular menstrual cycles, nervous diseases, urine retention, psychosis, bloating, angina, abdominal spasms, hernia, fissured tongue. CV4 (Guanyuan) : Connection point with KI, LV and SP. Deviated uterus, sterility, vertigo, spermatorrhea, insomnia, sexual impotence, diarrhea, hematuria,

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
			contraction of the uterus, cold and exhaustion.
75	Commissure-Commissure	SIMILAR SYMPTOMATOLOGY: Herpes 4. Virus. Ulcer that heals and leaves a mark, facial paralysis, neuralgia, skin lesion, cold sores that appear due to cold, temperature differences or menstrual cycle in some women.	ST4 (Dicang): Difficulty swallowing, tics and contractures of the facial muscle, mutism, deviation of the mouth, trigeminal neuralgia.
76	Chondral-Chondral	SIMILAR SYMPTOMATOLOGY: Pneumocystis Carinii. Fungus. You place the magnets under the nipples. It manifests in the lung. Chronic cough with phlegm. Frequent in premature infants, infants, weak immune system, in cortisone treatments. Fatigue, chills, cholesterol, mycosis in hands.	ST18 (Rugen): Cough with dyspnea, chest pain, cold extremities, mastitis, and bulimia. LV14 (Qimen): All post-partum infections. Febrile condition, chest pain, neurasthenia, stomachache, diarrhea, bloating, poor eye coordination, pleurisy, distention.
77	Pancreas duct-Left kidney	SIMILAR SYMPTOMATOLOGY: Spirochete. Bacterium. Inflammation of the pancreatic duct. It affects the level of insulin. Endogenous obesity Hepatic disorders. It simulates rheumatism. If it is associated with kidney-kidney, it can be nephrotic syndrome.	BL52 (Zhishi): Knee pain. It clears and mobilizes moisture and heat (eliminating them), infection in the urinary tract. Low back pain. SP15 (Daheng): Abundant perspiration, paralysis of arms and legs, dysentery, influenza, exhaustion, abdominal dysfunction.
78	CBD-Right kidney	SIMILAR SYMPTOMATOLOGY: Spirochete. Bacterium. Serious problems of nutrition, food intolerance.	SP15 (Daheng): Abundant perspiration, paralysis of arms and legs, dysentery, influenza, exhaustion, abdominal dysfunction. Rectal inflammation. It affects the digestion and the insulin level that is why it simulates diabetes. BL52 (Zhishi): Knee pain. It clears and mobilizes moisture and heat (eliminating them), infection in the urinary tract. Low back pain.
79	Contra cecum-Contra cecum	SIMILAR SYMPTOMATOLOGY: Bordetella pertussis. Bacterium. Disorders of the digestive tract, malabsorption, flatulence, diarrhea, abdominal tension. In women it causes vaginal discharge, bleeding. It lodges in the epithelium. Varicose veins and vascular problems, varicocele, osteoarthritis, hip degeneration, inguinal pain when extending the leg. It affects three glands.	SP12 (Chongmen): Abdominal pain, altered urination, abdominal swelling, stomach spasm, mastitis (inflammation of the breast).
80	Heart-Heart	SIMILAR SYMPTOMATOLOGY: Emotional. Bitterness, negativity and pessimism.	ST15 (Wuyi): Diseases of the lung and lower respiratory system, chest (pain, pressure in the chest) and breasts.
81	Heart-Homolateral rib	SIMILAR SYMPTOMATOLOGY: Special. Suffocation. Someone who closes to escape from reality. Deaf ears, oppression and fatigue in the chest that prevents him from breathing, committing.	ST16 (Yingchuang): Cough with dyspnea and expectoration, diseases of the lung, respiratory tract. Chest pain. LV13 (Zhangmen): Meeting point with GB and the 5 organs. Lack of energy, lumbar and extremity pain, meteorism with radiated pain, energetic disorders, anguish.
82	Heart-Pancreas	SIMILAR SYMPTOMATOLOGY: Special. Envy. Associated with gallbladder-gallbladder, pain or misfortune by not owning what the other has, whether in goods,	ST16 (Yingchuang): Cough with dyspnea and expectoration, diseases of the lung, respiratory tract. Chest pain.

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
		superior qualities or other kinds of things. It generates other types of vices.	SP15 (Daheng): Abundant perspiration, paralysis of arms and legs, dysentery, influenza, exhaustion, abdominal dysfunction.
83	Heart-Bladder	SIMILAR SYMPTOMATOLOGY: Emotional. Resentment, feeling again. It avoids changes in the expression. The person feels bad about what resentment reminds him. Anger and frustration, anger, resentment, prolonged suffering.	ST16 (Yingchuang): Cough with dyspnea and expectoration, diseases of the lung, respiratory tract. Chest pain. CV3 (Zhongji): Meeting point with SP, KI, LV. Exhaustion, urinary incontinence, male sterility, vulvar pruritus, uterine prolapse, prostatitis, deviations of the uterus, amenorrhea, leucorrhoea.
84	Coronary-Left lung	SIMILAR SYMPTOMATOLOGY: Streptococcus A. Bacterium. It changes the polarity of the heart artery. It may cause angina or heart attack. Psoriasis, tonsillitis, impetigo (skin lesions with blisters), coronary obstruction, cholesterol, skin problems.	ST16 (Yingchuang): Cough with dyspnea and expectoration, diseases of the lung, respiratory tract. Chest pain. SI11 (Tianzong): Shoulder, arm and elbow pain, cervicobrachial neuralgia. Swelling of the maxillary region. Unable to raise the arm.
85	Costal-Costal	SIMILAR SYMPTOMATOLOGY: Proteus mirabilis. Bacterium. It simulates pneumonia. Pleural, pulmonary and diaphragmatic manifestation, inflammation of the costal periosteum, pleural effusion.	LV13 (Zhangmen): Meeting point with GB and the 5 organs. Lack of energy, lumbar and extremity pain, meteorism with radiated pain.
86	Right costal-Liver	SIMILAR SYMPTOMATOLOGY: Borrelia. Bacterium. Transmission by ticks and lice. Hepatitis K (liver failure), the main cause of dysplasia (uterine, cervix, right breast), Lyme disease (The great imitator: fatigue, fibromyalgia, anorexia, cough, multiple sclerosis), cellulitis.	LV13 (Zhangmen): Meeting point with GB and the 5 organs. Lack of energy, lumbar and extremity pain, meteorism with radiated pain, energetic disorders, anguish. LV14 (Qimen): All post-partum infections. Febrile condition, chest pain, neurasthenia, stomachache, diarrhea, bloating, poor eye coordination, pleurisy, distention.
87	Rib 1-Rib 1	SIMILAR SYMPTOMATOLOGY: Trichophyton. Fungus. It goes to the lung. Bad axillary odor, ringworm in children, in adults only in case of immunodeficiency. Hair and dry ends, fragile nails.	LI17 (Tianding): Tonsillitis, pharyngitis, paralysis of the hyoid muscle. Special point for throat complaints.
88	Costodiaphragmatic-Costodiaphragmatic	SIMILAR SYMPTOMATOLOGY: Trypanosoma cruzi. Bacterium. Heart disease or heart failure. By blood-sucking insects, by ticks in the wood. Scoliosis, depending on where it lodges, may cause deficiencies, edema. Hepatomegaly, splenomegaly, megacolon.	LV14 (Qimen): All post-partum infections. Febrile condition, chest pain, neurasthenia, stomachache, diarrhea, bloating, poor eye coordination, pleurisy, distention. SP16 (Fuia): Abdominal pain, constipation, costal pain, dysentery, and ulcer.
89	Costohepatic-Costohepatic	SIMILAR SYMPTOMATOLOGY: Borrelia. Bacterium. Chronic diarrhea, annular cutaneous lesion, cellulitis. It affects the stomach, pylorus, liver and kidney. Dysplasia, elephantiasis.	LV14 (Qimen): All post-partum infections. Febrile condition, chest pain, neurasthenia, stomachache, diarrhea, bloating, poor eye coordination, pleurisy, distention. LV13 (Zhangmen): Meeting point with GB and the 5 organs. Lack of energy, lumbar and extremity pain, meteorism with radiated pain, energetic disorders, anguish.
90	Coccyx-Coccyx	SIMILAR SYMPTOMATOLOGY: Rotavirus. Virus. Vomiting and diarrhea. It is more serious in children than in adults. It	GV2 (Yaoshu): Pain in the spine and thighs, anal eczema, stiffness to bend,

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
		destroys the epithelial cells of the small intestine preventing the absorption of nutrients, pelvic, digestive, renal, sexual disorders, and hemorrhoids. Simulates prostatitis.	hemorrhoids, pain in the sacrum and coccyx.
91	Cranial-Cranial	SIMILAR SYMPTOMATOLOGY: Bacillus anthracis. Bacterium. Headache, nasopharyngeal problems, nasal polyps, pain, poor vision, photophobia, mucus, cysts, cutaneous ulcer of blackish and crusty appearance.	BL1 (Jingming): Meeting point of the SI and ST meridians. Blepharitis, conjunctivitis, glaucoma and swollen eyes.
92	Iliac crest-Iliac crest	SIMILAR SYMPTOMATOLOGY: Trypanosoma gambit. Bacterium. Sleep disorders, myalgias (muscle pain that may cause weakness, lack of strength), pelvic, digestive, renal, sexual disorders, paralysis, obesity, congestion (abnormal accumulation of fluid in some part of the body).	GB29 (Juliao): Renal pains irradiated to the lower abdomen, shoulder and arm pain, rheumatic pains in the legs, rubella, inability to raise the arm, lower back pain.
93	Quadratus lumborum-Quadratus lumborum	SIMILAR SYMPTOMATOLOGY: Treponema pallidum. Bacterium. It simulates arthritis Rheumatism, dorsal-lumbar pain, carpal tunnel syndrome, frozen shoulder, hardened elbow, hip and rigid column, vaginal and urethral discharge.	BL54 (Zhibian): It clears the heat and heals the hemorrhoids. It calms the pain. Slow digestions.
94	Quadriceps-Quadriceps	SIMILAR SYMPTOMATOLOGY: MAGDA. Special. Poisoning by bismuth, chemotherapy, insecticides, medicines, contaminated vegetables. It causes pain in the waist, hip, pelvis (simulating rheumatism), heavy legs, dyslexia, and hyperactivity.	ST32 (Futu): All gynecological conditions, circulation in legs, cramps, varicose veins, edema, cooling, stomachache, colitis.
95	Ulna-Ulna	SIMILAR SYMPTOMATOLOGY: Herpes 3. Virus. It manifests internally, affecting mucous membranes in the nose, ear, eye, bronchi and digestive tract. Split lips, canker sores, pain in the pelvis and arms. Acute inflammatory infection of the CNS. Blisters that leave a mark, pain and sensibility that covers the path of the affected nerve.	PC4 (Ximen): Amnesia, rheumatic pain in the forearms, wrist and fingers, schizophrenia, cough, hemorrhages of the rectum, nose or stomach, hemorrhoids. Fear.
96	Neck-Neck	SIMILAR SYMPTOMATOLOGY: Blastocystis hominis. Parasite. By contaminated water and food, their detritus goes to the brain causing seizures. Epilepsy, migraines, dermatitis, problems of skin, bladder and prostate.	TB16 (Tianyou): Neck pain, deafness, tinnitus, eye pain, edema of the face, buzzing in the ears.
97	Corpora cavernosa-Corpora cavernosa	SIMILAR SYMPTOMATOLOGY: Special. Erectile dysfunction, vascular problems of the penis, priapism (erection for hours), Parkinson's disease.	CV2 (Qugu): Meeting point with KI. Lack of energy, impotence, urethritis, spermatorrhea, endometritis, and irregular menstrual cycles.
98	Big toe-Big toe	SIMILAR SYMPTOMATOLOGY: Rickettsia. Bacterium. Mycosis. Athlete's foot. Ingrown toenails, thick nails.	LV1 (Dadun): Pain under the belly, uterine prolapse, dysmenorrhea, amenorrhea, intestinal spasms, drowsiness, fatigue, constipation, itching in the genitals.
99	Deltoids-Deltoids	SIMILAR SYMPTOMATOLOGY: Treponema pallidum. Bacterium. It affects the skin and mucous membranes causing	LI14 (Binao): Headaches, rheumatic disorders of the shoulder, torticollis, and

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
		necrosis and ulceration. It penetrates tissues, destroys collagen. Deficient immune system. Once it is fixed, it colonizes and it is difficult to eliminate. It simulates arthritis. Rheumatism.	diarrhea. Difficulty moving arms and shoulder.
100	Deltoids-Right kidney	SIMILAR SYMPTOMATOLOGY: Leishmania. Parasite. For fly bites. It may cause from welts, skin ulcers to inflammation of the liver and spleen. It affects both humans and dogs. It hives can last for years. It affects skin and mucous membranes. It weakens the immune system. Cutaneous or visceral infections.	LI14 (Binao): Headaches, rheumatic disorders of the shoulder, torticollis, and diarrhea. Difficulty moving arms and shoulder. BL52 (Zhishi): Knee pain, cramps in the calves, urinary retention. It protects the kidney and strengthens essence. It clears and mobilizes moisture and heat (eliminates them). Disorders of male sexual function. Urinary tract infection. Low back pain.
101	Dental-Kidney	SIMILAR SYMPTOMATOLOGY: ROSARIO. Temporary. Any tooth with pain, decay or infection. When there is pain, use a north polarity magnet in the area and a south polarity magnet on the kidney of the same side.	GV26 (Renzhong): Pain and stiffness of the spine. Inflammation of lips and face. Facial paralysis, rhinorrhea, anosmia, diabetes, infantile convulsions, halitosis. Muscle tightness of the eye and mouth. BL52 (Zhishi): Knee pain, cramps in the calves, urinary retention. It protects the kidney and strengthens essence. It clears and mobilizes moisture and heat (eliminates them). Disorders of male sexual function. Urinary tract infection. Low back pain.
102	Diaphragm-Diaphragm	SIMILAR SYMPTOMATOLOGY: Candida albicans. Fungus. It may affect different places such as the vagina, mouth, intestines or skin. Milkweed (canker sores). It affects mucous membranes. False pneumonia, respiratory and gastric diseases. In thymus, it affects immunity. Avoid flours, sugars. Extreme hygiene.	ST18 (Rugen): Cough with dyspnea, chest pain, cold extremities, mastitis, and bulimia. SP16 (Fuia): Diarrhea, persistent constipation, gastric ulcer, hypochlorhydria, and intestinal hemorrhage.
103	Diaphragm-Homolateral kidney	SIMILAR SYMPTOMATOLOGY: Brucella abortus. Bacterium. It causes problems in pregnancy. The infection prevents ventilation. It may cause miscarriage due to imbalance. The bones hurt. It simulates gastroduodenal ulcer and pneumonia. By dairy products and contaminated cheese.	BL52 (Zhishi): Knee pain, cramps in the calves, urinary retention. It protects the kidney and strengthens essence. It clears and mobilizes moisture and heat (eliminates them). Disorders of male sexual function. Urinary tract infection. Low back pain. ST22 (Guanmen): Acute gastritis, stomach atony, anorexia, poor digestion, intestinal catarrh.
104	Dorsal 2-Dorsal 2	SIMILAR SYMPTOMATOLOGY: Legionella. Bacterium. A more severe type of infection that occurs with pneumonia.	GV13 (Taodao): Meeting point with BL. Stiffness in the spine, febrile diseases, chills, insomnia, depressive states, dyspnea, and malaria.
105	Dorsal 6-Dorsal 6	SIMILAR SYMPTOMATOLOGY: Special. Infection due to immunological deficiency.	BL16 (Dushu): It calms the pain. The sensation of tension disappears. Stomach pain, abdominal pain.
106	Back-Back	SIMILAR SYMPTOMATOLOGY: Universal reservoir	BL16 (Dushu): It calms the pain. The sensation of tension disappears. Stomach pain, abdominal pain.
107	Dorsal 5-Lumbar	SIMILAR SYMPTOMATOLOGY:	GV3 (Yaoyangguan): Decongest meridian. Pain in the lumbosacral region,

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
		Meningococcus. Bacterium . Inflammation of meninges that poisons the blood. Purple spots on the skin. It may cause deafness and blindness. It simulates multiple sclerosis. Deforming rheumatoid arthritis, spina bifida, headache, stiff neck, lumbago, and diarrhea.	pain and loss of strength in the lower extremity. GV10 (Lingtai) : It calms the cough and relieves dyspnea, acute bronchitis, bronchial asthma, pain in the spine.
108	Duodenum-Duodenum	SIMILAR SYMPTOMATOLOGY: Dysfunctional . Duodenal dysfunction. Colitis nervosa, irritable colon. In the duodenum, the food is fermented causing gas, bad breath, headache, etc. By inflammation.	LV13 (Zhangmen) : It strengthens the spleen and harmonizes the stomach. It eliminates the sensation of tension and stimulates the gallbladder. Chronic diarrhea, gastroenteritis, cholecystitis, inflammation of the liver and spleen.
109	Duodenum-Liver	SIMILAR SYMPTOMATOLOGY: Chlamydia trachomatis. Bacterium . Anorexia. It produces urogenital infections, sterility in women. In man, testicular pain. It alters coagulation factors. Facial erythema For public baths, pools, stagnant waters.	SP15 (Daheng) : Abundant perspiration, paralysis of all four limbs, dysentery, and influenza, and exhaustion. LV14 (Qimen) : All post-partum infections. Febrile condition, chest pain, neurasthenia, stomachache, diarrhea, bloating, poor eye coordination, pleurisy, distention.
110	Duodenum-Right kidney	SIMILAR SYMPTOMATOLOGY: Mellitus diabetes. Deficiency of the pancreas to produce insulin, which controls the passage of glucose to the cells.	BL52 (Zhishi) : Knee pain, cramps in the calves, urinary retention. It protects the kidney and strengthens essence. It clears and mobilizes moisture and heat (eliminates them). Disorders of male sexual function. Urinary tract infection. Low back pain. SP15 (Daheng) : It orders the energy and calms the pain. It regulates and balances the large intestine. Pain in hypogastrium, chronic diarrhea, chronic dysentery, constipation.
111	Duodenum-Left kidney	SIMILAR SYMPTOMATOLOGY: Chlamydia trachomatis. Bacterium . Pterygium (fleshiness in the eye). It affects the coagulation system producing inflammation in the genitals. Intestinal and respiratory problems, abscesses in the womb and uterus. Retinal detachment, blindness.	SP15 (Daheng) : It orders the energy and calms the pain. It regulates and balances the large intestine. Pain in hypogastrium, chronic diarrhea, chronic dysentery, constipation. BL52 (Zhishi) : Knee pain, cramps in the calves, urinary retention. It protects the kidney and strengthens essence. It clears and mobilizes moisture and heat (eliminates them). Disorders of male sexual function. Urinary tract infection. Low back pain.
112	Epigastrium-Epigastrium	SIMILAR SYMPTOMATOLOGY: Giardia lamblia. Parasite . Nausea, vomiting, mucous diarrhea, abdominal pain, pruritus in the anus, teeth grinding. Parasite the digestive tract. It produces protein and vitamin deficiency. For contaminated food. It lodges and reproduces in the intestine.	CV13 (Shangwan) : It harmonizes the stomach and decreases the inverted energy, acute and chronic gastritis, stomachache, and hiccups.
113	Omentum-Omentum	SIMILAR SYMPTOMATOLOGY: Staphylococcus albus. Bacterium . It produces toxins that alkalize the skin and predispose acne vulgaris, rosacea and folliculitis. It also affects the mucosa and flora of the mouth and intestine. It affects the epidermis.	ST24 (Huaroumen) : It releases the spiritual energy and causes a generalized sedation. It harmonizes the stomach and the intestine. Psychic and psychosomatic disorders (sedative action), stomachache.

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
114	Scapula-Scapula	SIMILAR SYMPTOMATOLOGY: Mycobacterium leprae. Bacterium. Leprosy, it is very aggressive. It attacks the skin causing disfigurement and necrosis. It attacks the nervous system causing atrophy in limbs, loss of fingers, blindness.	BL43 (Gaohuangshu): Pulmonary tuberculosis, asthma, hemoptysis, dyspnea, feeling that the bones are getting burned, burning and pain in bones, lack of memory, insomnia, palpitations, spermatorrhea, sexual impotence, frigidity, stomach cancer. It strengthens the general health of the convalescent patient. In post-surgery, it strengthens lungs and kidneys. It increases the red blood formula.
115	Esophagus-Esophagus	SIMILAR SYMPTOMATOLOGY: Fasciolopsis buski. Parasite. Hepatic fascioliasis, jaundice. It may produce cadaverine (a toxin that can cause seizures), tracheal, digestive and cardiac problems. It obstructs the normal flow of the liver. Anorexia.	GV17 (Naohu): It expands the thorax. It orders energy, calms pain and relieves dyspnea. Bronchial asthma, poor milk production, spastic bronchitis. GV16 (Fengfu): It expands the thorax and decreases the inverted energy. Precordial pain, nausea and vomiting in gastric and esophageal diseases.
116	Esophagus-Pylorus	SIMILAR SYMPTOMATOLOGY: Clostridium perfringens. Bacterium. Toxins that cause necrosis, involved in gangrene, both in humans and animals. Appendicitis, gangrene, septicemia, dysphagia, stomachache, inflammation in the intestines.	ST22 (Guanmen): It regulates and balances the stomach and intestine. It mobilizes and eliminates water, resolves edemas. Acute and chronic gastroenteritis. Edema. CV23 (Lianquan): It regulates and expands the thorax. It orders energy, calms cough and relieves dyspnea. Bronchial asthma, asthmatic bronchitis, acute tonsillitis, esophageal diseases.
117	Esophagus-Left bladder	SIMILAR SYMPTOMATOLOGY: Histoplasma capsulatum. Fungus. It goes to the lung causing fever, chills, cough, and chest pain on inspiration. It also affects ganglia, skin, and nervous system. It intensifies any injury in the body. Digestive and bladder disorders. It simulates pneumonia, hoarseness. Due to a deficiency in the immune system. Asymptomatic. It can be by bird guano.	CV23 (Lianquan): It regulates and expands the thorax. It orders energy, calms cough and relieves dyspnea. Bronchial asthma, asthmatic bronchitis, acute tonsillitis, esophageal diseases. ST28 (Suidao): It regulates water, menstrual flow and calms pain. Urinary retention, constipation, dysmenorrhea, fertility disorders in women.
118	Sternocleidomastoid-Sternocleidomastoid	SIMILAR SYMPTOMATOLOGY: Dysfunction. Dysfunction of the central nervous system. It can cause low pressure, poor circulation of capillaries, excessive sweating, palpitations and irritable bowel, chilblains (swelling of fingers, cheeks, nose and ears due to cold and humidity, such as freezing). Lymphoid edema. Stomach or intestinal laziness.	SI16 (Tianchuang): It improves the acuity of the ear and unloads the holes in the upper part of the body. Diseases of the ear, pain and edema at the level of the pharynx and larynx. ST9 (Renying): It orders energy, relieves dyspnea, clears heat and disperses blockages. Hypertension, bronchial asthma, inflammations at the level of the pharynx and larynx, tonsillitis.
119	Sternum-Spleen	SIMILAR SYMPTOMATOLOGY: Special. It harmonizes the stomach and reduces the inverted energy. Liver diseases, inflammation of the spleen, migraine, anemia, emphysema, pulmonary ventilation.	CV13 (Shangwan): It expands the thorax and decreases the inverted energy. Precordial pain, nausea and vomiting in gastric and esophageal diseases. LV14 (Qimen): All post-partum infections. Febrile condition, chest pain, neurasthenia, stomachache, diarrhea, bloating, poor eye coordination, pleurisy, distention.

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
120	Sternum-Adrenal	SIMILAR SYMPTOMATOLOGY: LUCIO. Polycythemia. Special. Asymptomatic polycythemia. It alters the nervous system causing eating problems, drowsiness, hypotonia, thrombi or convulsions, cardiorespiratory problems, kidney problems. It increases blood viscosity (increase in red blood cells). It regulates hemoglobin.	CV16 (Shongting): It expands the thorax and decreases the inverted energy. Precordial pain, nausea, vomiting in gastric and esophageal diseases. GV6 (Jizhong): It strengthens the spleen, mobilizes moisture, calms the strength of the spirit and resolves spasms. Chronic enteritis, hemorrhoids, seizures. It has antispasmodic action.
121	Stomach-Pancreas tail	SIMILAR SYMPTOMATOLOGY: Food detoxification.	CV13 (Shangwan): It harmonizes the stomach and decreases the inverted energy, acute and chronic gastritis, stomachache, and hiccups. SP15 (Daheng): It orders the energy and calms the pain. It regulates and balances the large intestine. Pain in hypogastrium, chronic diarrhea, chronic dysentery, constipation.
122	Stomach-Heart	SIMILAR SYMPTOMATOLOGY: Emotional. Gluttony, lack of control of eating habits.	CV13 (Shangwan): It harmonizes the stomach and decreases the inverted energy, acute and chronic gastritis, stomachache, and hiccups. ST16 (Yingchuan): It reduces cough and relieves dyspnea. It clears the heat and resolves secretions, cough and shortness of breath in respiratory diseases. Mastitis.
123	Stomach-Stomach	SIMILAR SYMPTOMATOLOGY: Dysfunctional. Stomach cramps, poor digestion, belching, nausea, gastritis in the mouth of the stomach, halitosis, heartburn.	CV13 (Shangwan): It harmonizes the stomach and decreases the inverted energy, acute and chronic gastritis, stomachache, and hiccups. LV14 (Qimen): It decongests the liver and strengthens the spleen, harmonizes the stomach and reduces inverted energy. Liver diseases, inflammation of the spleen. Abdominal distention, diseases after childbirth.
124	Stomach-Liver	SIMILAR SYMPTOMATOLOGY: Hepatitis. Virus. Digestive disorders, intolerance to fats, weight gain.	CV13 (Shangwan): It harmonizes the stomach and decreases the inverted energy, acute and chronic gastritis, stomachache, and hiccups. LV13 (Zhangmen): Meeting point with GB and the 5 organs. Lack of energy, lumbar and extremity pain, meteorism with radiated pain, energetic disorders, anguish.
125	Stomach-Pylorus	SIMILAR SYMPTOMATOLOGY: Associated with cancer. It produces metastasis. Diarrhea, ulcers, gastritis, intolerance to lactose, gas gangrene.	CV13 (Shangwan): It harmonizes the stomach and decreases the inverted energy, acute and chronic gastritis, stomachache, and hiccups. ST22 (Guanmen): It regulates and balances the stomach and intestine. It mobilizes and eliminates water, resolves edemas. Acute and chronic gastroenteritis. Edema.
126	Stomach-Prostate	SIMILAR SYMPTOMATOLOGY: Emotional. Gluttony, lack of control of eating habits.	CV13 (Shangwan): It harmonizes the stomach and decreases the inverted energy, acute and chronic gastritis, stomachache, and hiccups.

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
			CV3 (Zhongji): It clears the force and awakens the senses, disorders of consciousness, psychic and psychosomatic disorders.
127	Stomach-Adrenal	SIMILAR SYMPTOMATOLOGY: Paramyxovirus. Virus. Skin problems, similar to measles, red spots on the skin, rash, fever, weakened general condition. It can inflame the lungs; it affects the conjunctiva of the eyes. Cough; bronchitis. By needles or from person to person.	CV13 (Shangwan): It harmonizes the stomach and decreases the inverted energy, acute and chronic gastritis, stomachache, and hiccups. GV6 (Jizhong): It strengthens the spleen, mobilizes moisture, calms the strength of the spirit and resolves spasms. Chronic enteritis, hemorrhoids, seizures. It has antispasmodic action.
128	Flank-Flank	SIMILAR SYMPTOMATOLOGY: Yersinia intestinalis. Bacterium. Intestinal problems. It affects the lymphatic system and then the circulatory system. For contaminated food, improperly prepared, reheated, and undercooked meat, fish and seafood, dairy products, pastry (such as fillings), sausages.	GB25 (Jingmen): It protects the kidney and strengthens the lower back, chronic enteritis, pain at lumbar level or the last ribs.
129	Buttock-Buttock	SIMILAR SYMPTOMATOLOGY: Intestinal parasites.	BL54 (Zhibian): It clears heat, heals hemorrhoids, and calms pain. Prostatitis and ischialgia (hip pain).
130	Left buttock-Left achilles	SIMILAR SYMPTOMATOLOGY: Reservoir. Nest or deposit where a pathogen lodges without causing diseases. It can remain asymptomatic.	BL54 (Zhibian): It clears heat, heals hemorrhoids, and calms pain. Prostatitis and ischialgia (hip pain). BL59 (Fuyang): It disperses the wind and calms the pain in head, neck and joints. It decongests the meridian. Pain and paralysis at the level of the leg.
131	Buttock-Pylorus	SIMILAR SYMPTOMATOLOGY: Veillonella. Bacterium. Digestive disorders Leg pain. Nausea, vomiting It lodges in the duodenum. Alters the gastric juices. Bacteria in vagina. Adhesions, leg pain, osteomyelitis (bone pain, fever, malaise, restlessness, discomfort, lumbago, swelling of the ankles, feet and legs).	BL54 (Zhibian): It clears heat, heals hemorrhoids, and calms pain. Prostatitis and ischialgia (hip pain). ST22 (Guanmen): It regulates and balances the stomach and intestine. It mobilizes and eliminates water, resolves edemas. Acute and chronic gastroenteritis. Edema.
132	Hepatic-Retro hepatic	SIMILAR SYMPTOMATOLOGY: Toxocara. Parasite. For cats and dogs. In people with weak immune system. It can cause mild diarrhea, intestinal discomfort, eye conditions. Keep pets clean, healthy, their utensils, where they sleep, etc.	LV13 (Zhangmen): Meeting point with GB and the 5 organs. Lack of energy, lumbar and extremity pain, meteorism with radiated pain, energetic disorders, anguish.
133	Hiatus-Esophagus	SIMILAR SYMPTOMATOLOGY: Enterobacter Pneumoniae. Bacterium. Lung and gastrointestinal problems, bad oral odor, yellowish secretions, cough, flu manifestation, pain on the side of the thorax. Reflux.	CV16 (Shongting): It expands the thorax and decreases the inverted energy. Precordial pain, nausea, vomiting in gastric and esophageal diseases. CV14 (Juque): Psychosis, fear, cough, sensation of thoracic fullness, precordial pain.
134	Hiatus-Tongue	SIMILAR SYMPTOMATOLOGY: Trichinella spiralis. Parasite. For consuming contaminated pork. It lodges in the intestine. Abdominal discomfort, cramps, diarrhea, muscle pain when breathing, chewing or	CV14 (Juque): Psychosis, fear, cough, sensation of thoracic fullness, precordial pain. ST4 (Dicang): Difficulty swallowing, trigeminal neuralgia, eyelid tics. Deviation of the mouth. Mutism.

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
		using long muscles (arms, legs). Fever, fatigue.	
135	Hiatus-Right testicle	SIMILAR SYMPTOMATOLOGY: Helicobacter Pylori. Bacterium. Inflammation and erosion of the gastric mucosa, so that an ulcer forms and reaches the CA. It causes pain, nausea, dyspepsia, weight loss (unable to eat). Bad digestion, hernias, severe stomach pain. It affects bones and affects sperm production.	CV14 (Juque): Psychosis, fear, cough, sensation of thoracic fullness, precordial pain. CV1 (Huiyin): Anuria (scanty or stops urine), weakness, hemorrhoids, anal itching. Liver, head, diseases in the genitals, premature ejaculation.
136	Hiatus-Right testicle	SIMILAR SYMPTOMATOLOGY: Acute or chronic bone infection usually caused by bacteria.	CV14 (Juque): Psychosis, fear, cough, sensation of thoracic fullness, precordial pain. CV1 (Huiyin): Urogenital diseases such as prostatitis.
137	Liver-Descending colon	SIMILAR SYMPTOMATOLOGY: Hepatitis. Virus. Pasteurella. Bacterium. Hepatitis A.	LV14 (Qimen): It decongests the liver and strengthens the spleen, harmonizes the stomach and reduces inverted energy. Liver diseases, inflammation of the spleen. Abdominal distention, migraine.
138	Liver-Heart	SIMILAR SYMPTOMATOLOGY: Emotional. Wrath.	LV14 (Qimen): It decongests the liver and strengthens the spleen, harmonizes the stomach and reduces inverted energy. Liver diseases, inflammation of the spleen. Abdominal distention, migraine. GV16 (Fengfu): Swollen tongue, deafness, hemiplegia, and epilepsy, all conditions of the head, torticollis, fear, blurred vision, hypertension, and kidney pain.
139	Liver-Liver	SIMILAR SYMPTOMATOLOGY: Hepatitis. Virus. Hepatitis C. By intake of fats and crude oils, alcohol, chocolates, margarine, vitamins A, D and E, antibiotics and anti-inflammatories, capsules of omega 3, 6 and 9. Cholesterol and high triglycerides, gastritis, lack of appetite, fatigue, and jaundice, muscle pain in arms, legs and knees. For the hangover. It simulates cirrhosis.	LV14 (Qimen): It decongests the liver and strengthens the spleen, harmonizes the stomach and reduces inverted energy. Liver diseases, inflammation of the spleen. Abdominal distention, migraine.
140	Liver-Occipital prominence	SIMILAR SYMPTOMATOLOGY: Universal reservoir.	LV14 (Qimen): It decongests the liver and strengthens the spleen, harmonizes the stomach and reduces inverted energy. Liver diseases, inflammation of the spleen. Abdominal distention, migraine. GV16 (Fengfu): Swollen tongue, deafness, hemiplegia, and epilepsy, all conditions of the head, torticollis, fear, blurred vision, hypertension, and kidney pain.
141	Liver-Right kidney	SIMILAR SYMPTOMATOLOGY: Special. Liver cirrhosis (fibrosis of the liver tissue). For different chronic diseases. Toxicity by food and preservatives, colorants, medicines, anti-inflammatories. It may cause irreversible kidney damage.	LV14 (Qimen): It decongests the liver and strengthens the spleen, harmonizes the stomach and reduces inverted energy. Liver diseases, inflammation of the spleen. Abdominal distention, migraine. BL52 (Zhishi): Knee pain. It clears and mobilizes moisture and heat (eliminating

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
			them), infection in the urinary tract. Low back pain.
142	Liver-Left kidney	SIMILAR SYMPTOMATOLOGY: Hepatic ameba. Parasite. Liver abscess. The amoeba lodges in the large intestine, penetrates the intestinal mucosa and spreads to other organs. Traveler's diarrhea. For vegetables, fruits and contaminated water.	LV14 (Qimen): It decongests the liver and strengthens the spleen, harmonizes the stomach and reduces inverted energy. Liver diseases, inflammation of the spleen. Abdominal distention, migraine. BL52 (Zhishi): Knee pain. It clears and mobilizes moisture and heat (eliminating them), infection in the urinary tract. Low back pain.
143	Hypophysis-Medulla	SIMILAR SYMPTOMATOLOGY: Diabetes insipidus. Metabolism and thirst disease.	GV24 (Shenting): Posterior and frontal headaches. Unrest. GV15 (Yamen): Epilepsy, altered speech, posterior headache, vertigo.
144	Hypophysis-Hypophysis	SIMILAR SYMPTOMATOLOGY: Special. Chronic disease due to insulin insufficiency. Decontrol of blood glucose levels. It simulates diabetes.	GV24 (Shenting): Nasal polyps, insomnia, epilepsy, eye inflammations, and rhinitis. Excitement (hyperactivity). GV8 (Jinsuo): It calms the spiritual strength and eliminates spasms. Psychic and psychosomatic disorders, fever, sedative and antispasmodic action.
145	Hypophysis-Ovary	SIMILAR SYMPTOMATOLOGY: CARMEN. Special. Glandular dysfunction, menstrual disorders. Amenorrhea (decrease or absence of menstruation) and functional dysmenorrhea (painful menstruation) due to various causes such as psychological impacts, malnutrition, intoxication, contraceptives, pituitary alterations, abortions, pelvic infections and other causes. Polycystic.	GV24 (Shenting): Nasal polyps, insomnia, epilepsy, eye inflammations, and rhinitis. Excitement (hyperactivity). ST30 (Qichong): Weakness, exhaustion, penile pain, bladder stones, hernia, abundant sweating.
146	Hypophysis-Adrenal	SIMILAR SYMPTOMATOLOGY: Chronic disease that occurs when the pancreas does not produce enough insulin to control the levels properly.	EX2 (Yintang): Frontal and posterior headaches, diseases of the eyes, nose and paranasal sinuses. GV8 (Jinsuo): Painful alterations of the middle and lower thoracic spine.
147	Hypophysis-Thyroids	SIMILAR SYMPTOMATOLOGY: Feelings of revenge.	EX2 (Yintang): Frontal and posterior headaches, diseases of the eyes, nose and paranasal sinuses. CV23 (Lianquan): Speech disorders, chronic myofascial pain, dysphagia, hyper-salivation, bronchitis, pharyngitis, and vomiting.
148	Hypophysis-Bladder	SIMILAR SYMPTOMATOLOGY: Dengue. Virus. Common dengue. Pain in joints, head and muscles, flu with a lot of mucus. Cold. It simulates false influenza. It simulates Alzheimer's and rheumatism. Dizziness, fatigue, intense chest pain. By mosquito bite.	GV24 (Shenting): Nasal polyps, insomnia, epilepsy, eye inflammations, and rhinitis. Excitement (hyperactivity). CV3 (Zhongji): Exhaustion, urinary incontinence, male sterility, vulvar pruritus, uterine prolapse, prostatitis, amenorrhea, leucorrhoea, deviations from the uterus.
149	Suprasternal notch-Left buttock	SIMILAR SYMPTOMATOLOGY: Reservoir. Nest or deposit where a pathogen lodges without causing diseases. It can remain asymptomatic.	BL54 (Zhibian): It clears heat, heals hemorrhoids, and calms pain. Prostatitis and ischialgia (hip pain). CV21 (Xuanji): Cough, asthma, chest pain, tonsillitis, dyspepsia, and pulmonary congestion.

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
150	Thyroid bone- Thyroid bone	SIMILAR SYMPTOMATOLOGY: Special. Extreme dryness of the mucous membranes: eyes, mouth, vagina, etc.	CV3 (Zhongji): Abscess in the floor of the mouth, cough, bronchitis, dysphonia, sialorrhea, difficulty swallowing, sublingual edema.
151	Humerus-Humerus	SIMILAR SYMPTOMATOLOGY: Enterobacter Pneumoniae. Bacterium. Respiratory and pulmonary problems. Bronchitis, abundant expectoration. Otitis, Laryngitis. Pneumonia. Cold. For dogs and cats, from person to person.	TB10 (Tianjing): Rheumatism of shoulder and back, torticollis, lumbago, hyperactivity, Parkinson's, writer's cramp, insomnia, tachycardia, conjunctivitis, nervous sweating.
152	Iliac-Iliac	SIMILAR SYMPTOMATOLOGY: ELENA. Special. Gastrointestinal dysfunction. Poor digestion of food and poor absorption of tissues. They eat little and are obese. There are no endocrine alterations. Varicose veins and constipation. Low self-esteem in women because of the size of their breasts.	GB29 (Juliao): Renal pains irradiated to the lower abdomen, shoulder and arm pain, rheumatic pains in the legs, rubella, inability to raise the arm, lower back pain.
153	Index finger-Index finger	SIMILAR SYMPTOMATOLOGY: ELENA. Special. Gastrointestinal dysfunction. Poor digestion of food and poor absorption of tissues. They eat little and are obese	LI1 (Shanyang): Headache, tooth pain, vertigo, cold sores, tinnitus from bumps, rheumatism in shoulders and back.
154	Infra axillary-Infra axillary	SIMILAR SYMPTOMATOLOGY: Pleurisy. Virus. Severe chest pain aggravated by coughing and inhaling.	GB22 (Yuanye): Malfunction of the arm, axillary adenopathy, general weakness, and neck inflammation.
155	Right inguinal- Posterior iliac spine	SIMILAR SYMPTOMATOLOGY: Reservoir. Nest or deposit where a pathogen lodges without causing diseases. It can remain asymptomatic.	SP13 (Fushe): Colitis, intestinal spasms, constipation, indigestion, abdominal tumors. BL48 (Yanggang): Sacroiliac arthritis, hemorrhoids, slow digestions, flank pain.
156	Glabella- Medulla	SIMILAR SYMPTOMATOLOGY: DAVID. Special. It regulates and levels the character. It helps people who are weak, hesitant, malleable or, on the contrary, people with a lot of character, authoritarian, dominant. Phobias, fears, traumas, insecurity. It corrects growth in children when there is no justification for not growing. Enochlophobia.	GV24 (Shenting): Nasal polyps, insomnia, epilepsy, eye inflammations, and rhinitis. Excitement (hyperactivity). GV15 (Yamen): Sudden loss of voice, stiffness of the tongue. Unable to speak, epistaxis, headaches, psychosis, stiff neck, pharyngitis.
157	Glabella-Sacrum	SIMILAR SYMPTOMATOLOGY: Reservoir. Nest or deposit where a pathogen lodges without causing diseases. It can remain asymptomatic.	BL53 (Baohuang): Spasms in the back or flanks, popliteal neuralgia, spasms in the ankles and in the lower abdomen, epilepsy and fever. GV2 (Yaoshu): Hemorrhoids, pain in the coccygeal and sacral region. Lumbar neuralgia. Erectile dysfunction.
158	Glabella-Kidney	SIMILAR SYMPTOMATOLOGY: Congress. Parasites reservoir.	BL53 (Baohuang): Spasms in the back or flanks, popliteal neuralgia, spasms in the ankles and in the lower abdomen, epilepsy and fever. BL52 (Zhishi): Urogenital dysfunctions.
159	Ischium- Ischium	SIMILAR SYMPTOMATOLOGY: Oncocercos. Parasite. Parasitic infestation that may cause injuries to the skin and eyes, causing blindness. Sudden blindness, flatulence. It affects breasts and CNS. For poorly cooked pork.	BL50 (Weicang): Hemorrhoids, dysuria, constipation, flatulence.

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
160	Lacrima-Lacrima	SIMILAR SYMPTOMATOLOGY: Haemophilus influenza. Bacterium. Rhinitis, laryngitis. It simulates pneumonia. Cold, nosebleed. Meningitis. Soft tissue infection. Arthritis, sepsis, otitis media, sinusitis, conjunctivitis.	BL1 (Jingming): Conjunctivitis, hordeolum, glaucoma, retinitis, and swollen eyes.
161	Larynx-Larynx	SIMILAR SYMPTOMATOLOGY: Bordetella pertussis. Bacterium. Respiratory problems. Spasmodic and abrupt cough. Chronic cough. It may affect the function of the thymus, thyroid and parathyroid adnexal glands.	CV23 (Lianquan): Speech disorders, chronic myofascial pain, dysphagia, and hyper-salivation.
162	Latissimus-Latissimus	SIMILAR SYMPTOMATOLOGY: Yersinia Penumoniae. Bacterium. Lung problems. Bad breath. Back pain. Fatigue. Body aches. Laryngeal cough type bronchitis, vaginal discharge, azoospermia. Transmission through the mouth and passes into angina.	BL43 (Gaohuangshu): Vital center, disorders of LV and GB. Asthenia, nausea, anorexia, neurasthenia. Revitalizer.
163	Tongue-Tongue	SIMILAR SYMPTOMATOLOGY: Scabies. Cutaneous problems. Dermatitis. It may cause alopecia areata (hair falls out by strands).	ST6 (Jiache): Facial paralysis, trigeminal neuralgia, inflammation of the oral cavity. Perioral eruptions of the skin.
164	Left tongue-Heart	SIMILAR SYMPTOMATOLOGY: Emotional. Someone who is not interested in others. Someone who might be willing to help others just because he expects something in return.	ST4 (Dicang): Difficulty swallowing, trigeminal neuralgia, eyelid tics. Deviation of the mouth. Mutism. ST16 (Yingchuan): It reduces cough and relieves dyspnea. Respiratory diseases, mastitis. Insomnia, pulmonary congestion.
165	Liver ligament-Right kidney	SIMILAR SYMPTOMATOLOGY: Adenovirus. Virus. It is confused with a common cold. Fever, distention of abdomen, ganglion and glandular inflammation. It simulates "HIV" or hepatitis. Conjunctivitis. It affects adenoids and lymph nodes. Respiratory diseases. Tumors.	LV14 (Qimen): It decongests the liver and spleen, and harmonizes the stomach. Liver diseases, inflammation of the spleen. Abdominal distention, diseases after childbirth. BL52 (Zhishi): Knee pain. It clears and mobilizes moisture and heat (eliminating them), infection in the urinary tract. Low back pain.
166	Internal ligament-Malleolus	SIMILAR SYMPTOMATOLOGY: Liver dysfunction.	BL39 (Weiyang): Pain in the wall behind the knee. Disorders of urination. KI3 (Taixi): Chronic painful alteration of the lumbar region, pleurisy, cough, uterine spasms.
167	Lumbar 4-Lumbar 4	SIMILAR SYMPTOMATOLOGY: Neisseria gonorrhoeae. Bacterium. Sexual contagion. Bad smell in the vagina or urethra in men. Genital problems. Gonorrhea. It generates pain in the affected area. Motor and sensation problems in legs. Deforming arthritis. It compresses sciatic nerve. Swimming is highly recommended.	BL52 (Zhishi): It protects the kidney. It strengthens the essence and eliminates the heat. Male sexual disorders. Urinary tract infection. Low back pain.
168	Mole-Kidney	SIMILAR SYMPTOMATOLOGY: Hantavirus. Virus. Moles still without pigmentation that grow. Fever, chills, headache, bone and muscle pain. Gastrointestinal symptoms (nausea, vomiting)	BL52 (Zhishi): It protects the kidney. It strengthens the essence and eliminates the heat. Male sexual disorders. Urinary tract infection. Low back pain.

		and abdominal pain). By rodents and white rats, having contact with their feces. For wineries, warehouses, cupboards, neglected houses. Wash all objects thoroughly.	
169	Zygomatic bone-Zygomatic bone	SIMILAR SYMPTOMATOLOGY: Enterovirus. Virus. Headache, dizziness, non-fetid diarrhea (chronic and watery), intestinal catarrh. It simulates "HIV". Epilepsy. Severe dehydration. Enteritis. Facial paralysis.	SI18 (Quanliao): Facial paralysis, trigeminal neuralgia. Diseases of the nose or eyes. ST3 (Juliao): It clears the heat, improves visual acuity. Diseases of the eye. Facial paralysis.
170	Zygomatic bone-Contralateral kidney	SIMILAR SYMPTOMATOLOGY: Plasmodium Vivax. Parasite. It simulates malaria or fibromyalgia. The severity depends on the immune system. Headaches, malaise, fevers and chills.	SI18 (Quanliao): Facial paralysis, trigeminal neuralgia. Diseases of the nose or eyes. BL52 (Zhishì): It protects the kidney. It strengthens the essence and eliminates the heat. Male sexual disorders. Urinary tract infection. Low back pain.
171	Mandible-Mandible	SIMILAR SYMPTOMATOLOGY: Neisseria gonorrhoeae. Bacterium. Halitosis, gingivitis, pyorrhea, loose or missing teeth, gonorrhea, arthritis, infertility.	ST5 (Daying): It disperses wind. Facial paralysis, tooth pain in the lower jaw, inflammation of the salivary glands. CV24 (Chengjiang): Hemiplegia, facial paralysis, language problems, stuttering, torticollis, diabetes, caries, mental disorders, canker sores.
172	Sternum handle-Sternum handle	SIMILAR SYMPTOMATOLOGY: Coxsackievirus. Virus. Immunodeficiency. Larynx, trachea, pharynx, ear, nose and airways. Conjunctivitis. It simulates asthma and HIV. By direct contact with secretions of the nose and throat, saliva, fluid of blisters or feces of an infected person (diapers), blisters on the hands and feet, canker sores or mouth sores, low fever, headache, loss of appetite.	LI17 (Tianding): All inflammatory diseases of the throat, tonsillitis, laryngitis, dysphonia (hoarseness or voice alterations).
173	Right mastoid-Heart	SIMILAR SYMPTOMATOLOGY: Emotional. Aggressiveness. From provocation to attack with gestures or words. Disrespect.	GB12 (Wangu): Point of union with BL and SI. Rheumatic disorders of the neck, hands and legs. Facial paralysis, insomnia, pharyngitis, atony of the orbicularis muscle of the lips, stiff neck. ST16 (Yingchuang): It reduces cough and relieves dyspnea. Respiratory diseases, mastitis. Insomnia, pulmonary congestion, gastritis and diarrhea.
174	Right mastoid-Hypophysis	SIMILAR SYMPTOMATOLOGY: Emotional. Haughtiness, ego, presumption, lack of humility.	GB12 (Wangu): Point of union with BL and SI. Rheumatic disorders of the neck, hands and legs. Facial paralysis, insomnia, pharyngitis, atony of the orbicularis muscle of the lips, stiff neck. GV24 (Shenting): Nasal polyps, insomnia, epilepsy, eye inflammations, and rhinitis. Excitement (hyperactivity).
175	Mastoid-Mastoid	SIMILAR SYMPTOMATOLOGY: Filariasis. Parasite. Deafness, Meniere, tinnitus, otitis, seizures (epilepsy). It accumulates in the brain. Elephantiasis because it hinders the lymphatic system. Inflammation of tissues. For flies and mosquitoes, for poor hygiene.	GB12 (Wangu): Point of union with BL and SI. Rheumatic disorders of the neck, hands and legs. Facial paralysis, insomnia, pharyngitis, atony of the orbicularis muscle of the lips, stiff neck.

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
176	Mediastinum-Mediastinum	SIMILAR SYMPTOMATOLOGY: Proteus mirabilis. Bacterium. Laryngeal, pulmonary and bronchial problems. Immunodeficiency. It affects stomach, cardia, trachea and thymus. It simulates pneumonia, bad breath. Lactose intolerance in children.	CV19 (Zigong): It expands the thorax and orders the energy. It calms cough and relieves dyspnea. Angina, esophageal diseases, vomiting, pain of sides, tonsillitis. CV17 (Tanzhong): Energetic disorders due to excess or lack, mastitis, cough, nocturnal asthma, hiccups.
177	Upper mediastinum-Lower mediastinum	SIMILAR SYMPTOMATOLOGY: Proteus mirabilis. Bacterium. Mediastinitis (inflammation of the mediastinum that affects the cardia, stomach, and pancreas). For excessive vomiting, surgery, accidental ingestion of caustics, trauma or endoscopy. It simulates HIV because it affects the thymus. Fever, chills, chest pain, respiratory failure. It simulates pneumonia. Bad breathing, laryngeal problems.	CV19 (Zigong): It expands the thorax and orders the energy. It calms cough and relieves dyspnea. Angina, esophageal diseases, vomiting, pain of sides, tonsillitis. CV17 (Tanzhong): Energetic disorders due to excess or lack, mastitis, cough, nocturnal asthma, hiccups.
178	Chin-Chin	SIMILAR SYMPTOMATOLOGY: Dysfunction. Asthma, bronchitis, ventilation disorders, pigmentary retinitis (night blindness, visual acuity), muscle that lowers the lower lip.	CV24 (Chengjiang): Hemiplegia, facial paralysis, language problems, stuttering, torticollis, diabetes, caries, mental disorders, canker sores.
179	Wrist-Wrist	SIMILAR SYMPTOMATOLOGY: Rickettsia. Bacterium. Pain in neck and arms. Infectious diseases by aerosols, stings, scratches, bites, water and contaminated food. For mites, ticks, fleas and lice (overcrowding and poor sanitary conditions), fever, rash, feeling sick. If combined with Calcaneus-calcaneus, it gives similar to Alzheimer.	PC7 (Daling): Cramps in the hand, boils, sadness, contracture of the arm and elbow, inflammation of the eyes, gastritis, angina pectoris, arrhythmia, dermatosis, very strong pain of the abdomen, and psychism.
180	Wrist-Lower tibia	SIMILAR SYMPTOMATOLOGY: Special. Place magnets crossed. Use it when there is discomfort after therapy.	SP8 (Diji): It strengthens the spleen, removes moisture, regulates menstrual flow and orders blood. Diarrhea and chronic dysentery, gynecological disorders (uterine fibroids, ovarian cysts). PC7 (Daling): Cramps in the hand, boils, sadness, contracture of the arm and elbow, inflammation of the eyes, gastritis, angina pectoris, arrhythmia, dermatosis, very strong pain of the abdomen, and psychism.
181	Stump-Stump	SIMILAR SYMPTOMATOLOGY: Reservoir. Nest or deposit where a pathogen lodges without causing diseases. It can remain asymptomatic. It simulates the flu. It may harbor any microorganism. Panic. Part of a cut limb that remains attached to the body or part of the body atrophied from birth and does not develop. Place magnets in the required polarity, in the area where the problem is. It has no location.	PC7 (Daling): Cramps in the hand, boils, sadness, contracture of the arm and elbow, inflammation of the eyes, gastritis, angina pectoris, arrhythmia, dermatosis, very strong pain of the abdomen, and psychism.
182	Nose-Nose	SIMILAR SYMPTOMATOLOGY: Toxoids. Special. Bacterial toxins generated in the nasal septum because of chronic infections or contamination (pepper, sulfur, lead, cocaine), allergic rhinitis, headache, dizziness, diarrhea. It simulates HIV.	GV24 (Shenting): Nasal polyps, insomnia, epilepsy, eye inflammations, and rhinitis.

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
183	Femoral nerve-Femoral nerve	SIMILAR SYMPTOMATOLOGY: Herpes 6. Virus. Allergies in the crotch, itching, grains that affect the mobility of the legs.	BL36 (Chengfu): Meeting with SI. Neck, shoulder and back pain. Paralysis of legs, sciatica, torticollis.
184	Inguinal nerve-Joint	SIMILAR SYMPTOMATOLOGY: Monoarticular rheumatoid arthritis. The joint is inflamed seasonally. There is edema and pain. It affects small joints. It might relate to gout. Ask which small joint hurts.	ST30 (Qichong): It regulates menstrual flow. Weakness, exhaustion. Penis pain. Disorders of menstruation and fertility, sexual impotence. Gallbladder stones, abundant sweating, disorders of sexual function of man.
185	Inguinal nerve-Liver	SIMILAR SYMPTOMATOLOGY: Roseola. Virus. Reddish spots, rosacea on face, inflamed ganglia, atopic neurodermatitis, around the mouth, folds of the arm and feet. Simulates hepatitis.	ST30 (Qichong): It regulates menstrual flow. Weakness, exhaustion. Penis pain. Disorders of menstruation and fertility, sexual impotence. Gallbladder stones, abundant sweating, disorders of sexual function of man. LV14 (Qimen): It decongests the liver and spleen, and harmonizes the stomach. Liver diseases, inflammation of the spleen. Headaches.
186	Inguinal nerve-Inguinal nerve	SIMILAR SYMPTOMATOLOGY: Reservoir. Nest or deposit where a pathogen lodges without causing diseases. It can remain asymptomatic. Urethral, bladder problems, pelvic inflammations, lower back pain. It alters the sexual function.	ST30 (Qichong): It regulates menstrual flow. Weakness, exhaustion. Penis pain. Disorders of menstruation and fertility, sexual impotence. Gallbladder stones, abundant sweating, disorders of sexual function of man.
187	Nape-Sacrum	SIMILAR SYMPTOMATOLOGY: Special. It regulates the flow of cerebrospinal fluid. Vaginal discharge. It transports nutrients to the brain and eliminates waste. It is composed of water, sodium, potassium, calcium, chlorine, organic salts (phosphates) and organic compounds (glucose). Some diseases alter its composition.	GV2 (Yaoshu): Amenorrhea, urethritis, pain in the spine and thighs, anal eczema, stiffness to bend, epilepsy. GV15 (Yamen): Sudden loss of voice, epilepsy, rigidity of the tongue, unable to speak, epistaxis, headaches, psychosis, stiff neck, pharyngitis.
188	Occipital-Occipital	SIMILAR SYMPTOMATOLOGY: Epstein Barr. Herpes. Virus. Mononucleosis or "kissing disease" (fever, sore throat, extreme fatigue and inflamed lymph glands), neurological problems, senile dementia, anxiety, psychopathies, bipolar syndrome, dizziness, irritability, mental confusion, phobias, blood inflammation. For saliva.	GV17 (Naohu): It clarifies the brain and awakens the senses. It helps the liver. Psychic and psychosomatic disorders. Hypertension. Change toothbrush.
189	Inner ear-Inner ear	SIMILAR SYMPTOMATOLOGY: Toxoplasma Gondii. Parasite. Mild disease that gets complicated until death. It affects the behavior like slowness to react, feeling of insecurity or neurosis. It is bad for pregnancy. Ear pathologies. It destroys internal structures of the ear. Deafness, tinnitus, vertigo, dizziness. Due to its proximity, it deranges the CNS, causing epilepsy, seizures, intracranial or intraspinal abscesses. By cats and parrots, through their feces, hair or saliva.	SI19 (Tinggong): It gathers meridians of GB and TB. Temporomandibular arthritis, otitis, eczema, weak vision.

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
190	Ear-Kidney	SIMILAR SYMPTOMATOLOGY: GOIZ. Special. It affects the CNS, the bronchopulmonary system, the renal system. It simulates asthmatic bronchitis and chronic asthma. Shortening of a lower limb. Fear.	SI19 (Tinggong): It gathers meridians of GB and TB. Temporomandibular arthritis, otitis, eczema, weak vision. BL52 (Zhishi): It protects the kidney. It strengthens the essence and eliminates the heat. Male sexual disorders. Urinary tract infection. Low back pain.
191	Eye-Scapula	SIMILAR SYMPTOMATOLOGY: Special. Cataracts.	ST1 (Chengqi): Meeting point with GB meridian. Myopia, conjunctivitis, facial paralysis, lacrimation, eyelid tics.
192	Eye-Eye	SIMILAR SYMPTOMATOLOGY: Cytomegalovirus. Virus. It affects the salivary glands. By direct contact with saliva, blood, urine, semen. By transplanted organs. If the immune system is weak, it causes very serious infections. Inflammation of lymph nodes, especially of the neck, fever, fatigue, lack of appetite, muscle pain. It affects the CNS.	ST1 (Chengqi): Meeting point with GB meridian. Myopia, conjunctivitis, facial paralysis, lacrimation, eyelid tics.
193	Navel-Navel	SIMILAR SYMPTOMATOLOGY: Special. For people who form thrombi. Problems of coagulation, bruising, thrombocytopenic purpura.	KI16 (Huangshu): Sterility, acute conjunctivitis, gastralgia, meteorism, urethritis, jaundice, ocular congestion, spasms, pain and pressure in the abdomen, constipation, and diarrhea.
194	Navel-Testicle	SIMILAR SYMPTOMATOLOGY: SATURNINO. Special. Oedipus complex, feelings of love and hostility towards parents. Momma's boy.	KI16 (Huangshu): Sterility, acute conjunctivitis, gastralgia, meteorism, urethritis, jaundice, ocular congestion, spasms, pain and pressure in the abdomen, constipation, and diarrhea. CV2 (Qugu): Lack of energy (emptiness of the organs), sexual impotence, urethritis, spermatorrhea, endometritis, and irregular menstrual cycles.
195	Navel-Uterus	SIMILAR SYMPTOMATOLOGY: TRINI. Special. Electra complex, feelings of love and hostility towards parents. Daddy's girl.	KI16 (Huangshu): Sterility, acute conjunctivitis, gastralgia, meteorism, urethritis, jaundice, ocular congestion, spasms, pain and pressure in the abdomen, constipation, and diarrhea. CV2 (Qugu): Lack of energy (emptiness of the organs), sexual impotence, urethritis, spermatorrhea, endometritis, and irregular menstrual cycles.
196	Outer ear-Outer ear	SIMILAR SYMPTOMATOLOGY: LENY. Special. Poisoning. It regulates the functions of the 12 cranial nerves affected by cerebral vascular accident, traumatic brain injury, and pathological lesions. It releases the 12 cranial pairs. Olfactory, ophthalmic problems. Common ocular motor. Auditory nerve. Glosso-pharyngeal. Vagus nerve. Hypoglossal major. Spinal. Nervous tics. Facial paralysis.	SI19 (Tinggong): It gathers meridians of GB and TB. Temporomandibular arthritis, otitis, eczema, weak vision.
197	Ovary-Ovary	SIMILAR SYMPTOMATOLOGY: Dysfunction. To correct menopause and menstrual disorders, colic, polycystic ovaries, excess of hair in women, dysmenorrhea and in some cases endometriosis.	SP13 (Fushe): Colitis, intestinal spasms, constipation, indigestion, abdominal tumors, hepatitis. It regulates the intestine and the stomach. Bloating, edema, sensation of abdominal fullness, flatulence,

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
			external abdominal hernias, constipation, indigestion.
198	Pancreas-Stomach	SIMILAR SYMPTOMATOLOGY: CHACO. Special. Allergies. Food allergies, mainly seafood. Skin allergies.	LI13 (Zhangmen): Painful alterations of the abdomen associated with flatulence and indigestion.
199	Pancreas-Pancreas	SIMILAR SYMPTOMATOLOGY: Heavy metal poisoning. Pancreatitis. Toxins produced by metals such as mercury or lead.	LI13 (Zhangmen): Painful alterations of the abdomen associated with flatulence and indigestion.
200	Parathyroid-Parathyroid	SIMILAR SYMPTOMATOLOGY: Glandular dysfunction. It controls the calcium in the blood, in the bones and the nervous system. Activation occurs by trauma, insolation, age, infections. It produces hypocalcemia. It is asymptomatic. It causes tingling and numbness of the fingers and the perioral region. Irritability, spasms.	CV13 (Shangwan): It expands the thorax and decreases the inverted energy. Precordial pain, nausea and vomiting in gastric and esophageal diseases.
201	Paravertebral-Paravertebral	SIMILAR SYMPTOMATOLOGY: Radiculopathy Special. Injury to a nerve root that causes pain and discomfort. When the nerve is compressed, it causes a lack of sensitivity, tingling, weakness. For weakness of vertebrae, osteoarthritis, tumors, overweight, for practicing sports, falls, accidents, for carrying heavy objects, poor quality shoes. Place on affected vertebra.	BL23 (Shenshu): Kidney settlement. It protects the kidney and regulates menstrual flow. It mobilizes and eliminates water. Disorders of male sexual dysfunction, irregular menstruation, urinary incontinence, and low back pain.
202	Parietal-Medulla	SIMILAR SYMPTOMATOLOGY: Dysfunction. Mental imbalance. The parietal is responsible for receiving sensations of temperature, pressure (force) and pain. It coordinates the balance. The Medulla controls coughing, vomiting, sneezing, swallowing, speaking. It regulates the secretion of digestive juices. It affects attention, memory, concentration. Noise is unbearable.	GB19 (Naokong): Shoulder and neck pain, delirium, gingivitis, epilepsy, contractures, mental depression. GV17 (Naohu): It clarifies the brain and awakens the senses. It helps the liver. Psychic and psychosomatic disorders. Hypertension.
203	Parietal-Transverse colon	SIMILAR SYMPTOMATOLOGY: Entamoeba histolytica. Parasite. Crisis of absence and tumors in the brain, atheroma, epilepsy, behavioral disorders. It affects the whole organism. Digestive disorders, brain and liver problems, diarrhea. By contamination of water, vegetables, fruits, poorly washed food; it can also be by flies or cockroaches.	GB19 (Naokong): Shoulder and neck pain, delirium, gingivitis, epilepsy, contractures, mental depression. CV7 (Yinjiao): Meeting point with RI, PC and TB. Vulvar itching, irregular menstruation, nervous diseases, urine retention, psychosis, bloating, angina, abdominal spasms, hernia, fissured tongue.
204	Parietal-Parietal	SIMILAR SYMPTOMATOLOGY: Encephalitis. Virus. Diseases caused by inflammation of the brain that cause alterations such as headache, nausea and vomiting, stiff neck, mental confusion, aggression, irritability, clumsiness, sensitivity to light, speech disorders, dizziness, cerebral edema, seizures (absence crisis), disorientation, memory loss, sleeping sickness. It alters the sleep cycle and deranges the CNS.	GB19 (Naokong): Shoulder and neck pain, delirium, gingivitis, epilepsy, contractures, mental depression.

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
205	Parietal-Contralateral kidney	SIMILAR SYMPTOMATOLOGY: Plasmodium Vivax. Parasite. Shortening of a lower limb, kidney congestion, and heaviness of the head with deafness and fatigue. Brain, lung or kidney dysfunction. Chronic cough. Depression. Balance. Insomnia. Migraine. Musculoskeletal problems. It simulates fibromyalgia and rheumatism. Chills, digestive problems.	BL52 (Zhishi): Knee pain. It clears and mobilizes moisture and heat (eliminating them), infection in the urinary tract. Low back pain. GB19 (Naokong): Shoulder and neck pain, delirium, gingivitis, epilepsy, contractures, mental depression.
206	Parotid-Parotid	SIMILAR SYMPTOMATOLOGY: Glandular dysfunction. It produces carotene that excites the production of calcitonin and insulin thyroxine.	ST5 (Daying): Chronic myofascial pain of the face, pain of teeth in the lower jaw, facial paralysis.
207	Ey lid-Eyelid	SIMILAR SYMPTOMATOLOGY: Neisseria catarrhalis. Bacterium. It resides in the respiratory tract. It causes respiratory tract infections. An opportunistic pathogen that may cause bacteremia, meningitis, cellulitis, otitis, conjunctivitis, and sinusitis. Associated with pneumonia. Cold different from the common one, epistaxis (bleeding from the nose), headache and eye pain.	ST1 (Chengqi): Myopia, conjunctivitis, facial paralysis, lacrimation. It clears the heat and improves visual acuity. Night blindness, tics and contractures of the facial muscles.
208	Right pectoral-Quadriceps tendon	SIMILAR SYMPTOMATOLOGY: Special. It raises vital energy and prevents or diminishes healing crises (it is a laborious effort of the organs of the body to eliminate waste and facilitate the path towards regeneration).	ST16 (Yingchuang): Gastritis, diarrhea, mastitis, insomnia, fever, cough, dyspnea, thoracic fullness, pulmonary congestion. ST34 (Liangqiu): Acute painful processes of the meridian of the stomach, problems of the knee and foot, lumbar pains, cystitis, edema, chest pain.
209	Left pectoral-Quadriceps tendon	SIMILAR SYMPTOMATOLOGY: Special. It raises vital energy and prevents or diminishes healing crises (it is a laborious effort of the organs of the body to eliminate waste and facilitate the path towards regeneration).	ST16 (Yingchuang): Gastritis, diarrhea, mastitis, insomnia, fever, cough, dyspnea, thoracic fullness, pulmonary congestion. ST34 (Liangqiu): Acute painful processes of the meridian of the stomach, problems of the knee and foot, lumbar pains, cystitis, edema, chest pain.
210	Pericardium-Pericardium	SIMILAR SYMPTOMATOLOGY: Staphylococcus aureus coagulase. Bacterium. Bag of tissue that covers the heart, the bacteria may produce a series of skin infections, mucous membranes, folliculitis, conjunctivitis, cellulitis, abscesses, osteomyelitis, meningitis, pneumonia. It becomes inflamed and passes to the lung, giving a symptomatology similar to pneumonia, meningitis. It also affects the gastrointestinal tract. Arrhythmias, tachycardia.	ST16 (Yingchuang): Gastritis, diarrhea, mastitis, insomnia, fever, cough, dyspnea, thoracic fullness, pulmonary congestion. ST14 (Kufang): Pulmonary congestion, pleurisy, and cough with expectorations, asthma, emphysema, gastritis, rashes, hypochlorhydria, and apnea (breathing stops).
211	Perihepatic-Perihepatic	SIMILAR SYMPTOMATOLOGY: Morganella typhus. Bacterium. Problems of the urinary tract. It settles in the digestive tract like the colon. It is a nosocomial infection. For surgical wounds, severe diarrhea, anorexia, severe digestive disorders.	LI13 (Zhangmen): Lack of energy, lumbar pain and extremities and chest, cough, dyspnea, meteorism with intense radiated pain, vomiting, anguish. SP16 (Fuai): It strengthens the spleen and eliminates indigestion. Acute and chronic dysentery. Constipation.

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
212	Peritoneum-Pleura	SIMILAR SYMPTOMATOLOGY: MOSES. Reservoir. A membrane that covers the abdominal organs. Peritonitis is an inflammation caused by excess of gas. Ascites is an excess of fluids. The pleura controls the entry and exit of fluids such as lymph and proteins.	ST16 (Yingchuang): Gastritis, diarrhea, mastitis, insomnia, fever, cough, dyspnea, thoracic fullness, pulmonary congestion. BL41 (Yingchuang): Colitis, pain in the arm and chest. It calms cough, relieves dyspnea, and soothes pain. Pain in shoulders, back and rib cage.
213	Pylorus-Anus	SIMILAR SYMPTOMATOLOGY: Hantavirus. Virus. Acute lung or kidney disease. For rodents. Muscle aches, fever, migraine, cough, nausea or vomiting, diarrhea, abdominal pain, respiratory distress (due to accumulation of fluids in the lungs), inability to breathe.	SP16 (Fuai): It strengthens the spleen and eliminates indigestion. Acute and chronic dysentery. Constipation. GV2 (Yaoshu): Amenorrhea, urethritis, pain in the spine and thighs, anal eczema, stiffness to bend, epilepsy
214	Pylorus-Liver	SIMILAR SYMPTOMATOLOGY: Enterobius vermicularis pinworms. Parasite. Earthworms, gastrointestinal disorders, anal itching, teeth grinding, insomnia and lack of rest. It alters the absorption of nutrients.	SP16 (Fuai): It strengthens the spleen and eliminates indigestion. Acute and chronic dysentery. Constipation. LI14 (Binao): It decongests the liver and spleen, and harmonizes the stomach. Liver diseases, inflammation of the spleen, abdominal distension, postpartum diseases.
215	Pylorus-Pylorus	SIMILAR SYMPTOMATOLOGY: Dysfunction. The pylorus is a valve that connects the stomach to the duodenum. Poisoning by medications or food. Children with recurrent vomiting.	SP16 (Fuai): It strengthens the spleen and eliminates indigestion. Acute and chronic dysentery. Constipation.
216	Pylorus-Left kidney	SIMILAR SYMPTOMATOLOGY: Entamoeba histolytica. Parasite. Amoebiasis is a food-borne intestinal disease caused by the consumption of contaminated food or liquids. It may extend to other organs. Diarrhea and constipation, abdominal pain. Metal taste in the mouth, very unpleasant. Liver abscess.	SP16 (Fuai): It strengthens the spleen and eliminates indigestion. Acute and chronic dysentery. Constipation. BL23 (Shenshu): Kidney settlement. It protects the kidney and regulates menstrual flow. It mobilizes and eliminates water. Disorders of male sexual dysfunction, irregular menstruation, urinary incontinence, and low back pain.
217	Pylorus-Ureter	SIMILAR SYMPTOMATOLOGY: Intestinal mycelium. Fungus. Within the digestive tract, inflammation after eating, very pathogenic, watery diarrhea, anemia. The fungus does not allow the absorption of iron and nutrients. Severe intestinal problems. Food allergies.	SP16 (Fuai): It strengthens the spleen and eliminates indigestion. Acute and chronic dysentery. Constipation. SP12 (Chongmen): Abdominal pain, leucorrhea, bloating and hernia.
218	Pineal-Medulla	SIMILAR SYMPTOMATOLOGY: Guillain-Barré. Virus. Paralysis, weakness in legs, arms and respiratory muscles, dizziness, fatigue, circulatory problems. It affects the entire nervous system (Polyradiculoneuritis). The spinal bulb is the center of breathing that becomes blocked and hypoxic, choking, sleep apnea. Paralyzes several muscles of the body progressively.	GV17 (Naohu): It clarifies the brain and awakens the senses. It helps the liver. Psychic and psychosomatic disorders. Hypertension. GV20 (Baihu): (The 100 meetings), palpitations, nasal obstruction, anosmia, rhinitis, tinnitus, excitement, depression, lack of concentration, insomnia, cerebral anemia, stuttering, nervous system weakness, amnesia.
219	Pineal-Pancreas	SIMILAR SYMPTOMATOLOGY: Emotional. Lust. Excess or too much in some things.	GV20 (Baihu): (The 100 meetings), palpitations, nasal obstruction, anosmia, rhinitis, tinnitus, excitement, depression, lack of concentration, insomnia, cerebral

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
			anemia, stuttering, nervous system weakness, amnesia. ST24 (Huaroumen): Psychosis, epilepsy, vomiting, gastroenteritis, ulcers on the tongue. Special for diarrhea.
220	Pineal-Pineal	SIMILAR SYMPTOMATOLOGY: Dysfunction. It acts on pigmentation, vitiligo or hypochromic, sexuality when the libido goes down, dysarthria (difficulty in speaking and articulating). It decreases anxiety and insomnia and regulates sleep, in relation to the Circadian cycle. Menopause.	GV20 (Baihui): (The 100 meetings), palpitations, nasal obstruction, anosmia, rhinitis, tinnitus, excitement, depression, lack of concentration, insomnia, cerebral anemia, stuttering, nervous system weakness, amnesia.
221	Pineal-Prostate/Uterus	SIMILAR SYMPTOMATOLOGY: Emotional. Abandonment. Negligence. The person suffers damage by experiencing this situation.	GV20 (Baihui): (The 100 meetings), palpitations, nasal obstruction, anosmia, rhinitis, tinnitus, excitement, depression, lack of concentration, insomnia, cerebral anemia, stuttering, nervous system weakness, amnesia. CV2 (Qugu): Meeting point with LV. Lack of energy, impotence, urethritis, spermatorrhea, endometritis, and irregular menstrual cycles.
222	Orbital floor-Orbital floor	SIMILAR SYMPTOMATOLOGY: Orf. Virus. It causes vision problems, acidity in the eyes. It affects the optic nerve and the structures. Activation occurs by light from computers or similar objects. Nervous disorders. Photophobia. Glaucoma, fever, pharyngitis, diarrhea.	ST1 (Chengqi): Meeting point with GB meridian. Myopia, conjunctivitis, facial paralysis, lacrimation, eyelid tics. BL1 (Jingming): Blepharitis (inflammation of the eyelid), conjunctivitis, styes (inflammation of an eyelid gland), glaucoma, retinitis, swollen eyes.
223	Light pleura-Liver	SIMILAR SYMPTOMATOLOGY: Hepatitis B. It causes hepatitis by a DNA virus.	SP17 (Shidou): Esophagitis due to reflux, intercostal neuralgia, pulmonary congestion, pleurisy. It acts on liver pains. LI14 (Binao): It decongests the liver and spleen, and harmonizes the stomach. Liver diseases, inflammation of the spleen, abdominal distension, postpartum diseases.
224	Right pleura-Peritoneum	SIMILAR SYMPTOMATOLOGY: MOSES. Reservoir. Nest or deposit where a pathogen lodges without causing diseases. It can remain asymptomatic. Place where pathogenic germs (bacteria) develop. Scan everything all over again.	SP21 (Dabao): Chest pain, problems of the stomach, liver and gallbladder. ST30 (Qichong): Weakness, exhaustion, chest pain, pain in the penis, sexual impotence, low back pain, painful retraction in the testicles, gallstones, hernia, abundant sweating.
225	Pleura-Pleura	SIMILAR SYMPTOMATOLOGY: Pleurisy. Virus. Pleurisy is an inflammation resulting from pneumonia that causes a pain similar to a stabbing that intensifies when breathing deeply or when coughing.	SP21 (Dabao): Chest pain, problems of the stomach, liver and gallbladder.
226	Cervical plexus-Cervical plexus	SIMILAR SYMPTOMATOLOGY: Enterococcus faecalis. Bacterium. Mouth odor, pain in arms, throat closes. Symptoms similar to multiple sclerosis. It affects arms and neck. Stiff neck. It affects the ears and nose. It unblocks both the patient and the therapist. Intestinal problems. Transmitted by excrement, preserves or open wine.	LI18 (Futu): Torticollis, cough, asthma, dysphonia, laryngitis, tonsillitis, paralysis of the tongue, hypothyroidism.

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
227	Circle of Willis-Circle of Willis	SIMILAR SYMPTOMATOLOGY: Reovirus. Virus. Asymptomatic or very mild infections of the respiratory tract. It affects the gastrointestinal system, produces joint inflammation, joint thickening and lameness. Malabsorption syndrome It prevails in egg, chicken and turkey.	GB4 (Hanyan): Rheumatic pains of the neck, arm and hand. Eyes pain, defective vision, epilepsy, sneezing crisis.
228	Lobe-Lobe	SIMILAR SYMPTOMATOLOGY: ABRAHAM. Special. Dharma (path of right). It regulates vertical balance (difficulty walking), Dyslexia (change words and letters). Confusion between right and left. Stuttering. It affects the speech. Happiness.	ST8 (Touwei): Facial paralysis, eye pain, spasm of the lips, trismus (spasm of the muscles of the jaw), tearing, weak vision, vertigo, brain congestion (sudden disturbance of cerebral circulation).
229	Cheekbone-Kidney	SIMILAR SYMPTOMATOLOGY: Plasmodium Vivax. Parasite. Scan both cheekbones. Joint pain. Symptoms similar to fibromyalgia. Body aches, decay, fatigue, chills, severe digestive problems, gout (uric acid). By mosquito bite. Irritable bladder, hot flushes, psychiatric symptoms.	BL52 (Zhishi): It protects the kidney. It strengthens the essence and eliminates the heat. Male sexual disorders. Urinary tract infection. Low back pain. ST3 (Juliao): Hemiplegia, facial paralysis, trigeminal neuralgia, stuttering, tonsillitis, torticollis, acne, glaucoma, rhinitis, eyelid tics.
230	Popliteal-Popliteal	SIMILAR SYMPTOMATOLOGY: Pneumococcus. Bacterium. Infections similar to pneumonia, sinusitis, peritonitis. Severe invasive processes such as meningitis, septicemia, mainly in the elderly or in children with weak immune systems. It is part of the flora in the mouth, skin, intestines and respiratory tract. Otitis. The extravascular fluid that forms in the inflammation accumulates in the diaphragm, due to stress, scares, etc., goes to the lung.	BL40 (Weizhong): Pain in the eyes, fatigue, epistaxis, abdominal cramps, sciatica, and insomnia, nerve pain in one or both arms.
231	Post pineal-Post pineal	SIMILAR SYMPTOMATOLOGY: XCARET. Emotional. Integrity of moral and emotional values. The values are goals that guide the activity of the person, like a distinctive mark. Affectivity. Emotions become stronger, different and new. It is the expression and understanding of feelings.	GV20 (Baihui): (The 100 meetings), palpitations, nasal obstruction, anosmia, rhinitis, tinnitus, excitement, depression, lack of concentration, insomnia, cerebral anemia, stuttering, nervous system weakness, amnesia.
232	Preauricular-Preauricular	SIMILAR SYMPTOMATOLOGY: Neocardia Americana. Bacterium. A rare infection that can start in the lungs and disregard other organs such as the brain and skin, compromising the kidneys, joints, heart, eyes and bones. If it affects the skin, it produces ulcers that pass to the lymph nodes and suppurate. Inflammation in the gums, mouth, ears and tongue. Pain in ears for water.	GB7 (Qubin): Torticollis, trismus (spasm of the muscles of the jaw), eye diseases, premature aging, and neuralgia of alcoholics.
233	Cervical 1-Pylorus	SIMILAR SYMPTOMATOLOGY: Malaria. Headache, nausea, muscle aches, diarrhea, anemia, decay, fever.	GV13 (Taodao): It clears heat and releases surface. Colds, flu. SP16 (Fuai): Abdominal pain, constipation, costal pain, dysentery, gastric ulcer, constipation.

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
234	Post pineal-Bladder	SIMILAR SYMPTOMATOLOGY: Cryptococcus Neoformans. Fungus. It enters through the upper respiratory tract, the fungus colonizes the bronchi, and it spreads through the skin, bones, and abdominal viscera and into the CNS. For decomposing animals and pigeons.	CV3 (Zhongji): Exhaustion, urinary incontinence, male sterility, vulvar pruritus, uterine prolapse, prostatitis, amenorrhea, leucorrhoea, deviations from the uterus. GV22 (Xinhui): Nasal obstruction, anosmia, epistaxis, headache, apoplexy with aphasia, motor disorders of the eyes, excessive sleep.
235	Prostate-Prostate	SIMILAR SYMPTOMATOLOGY: Dysfunction. The prostate provides 50% of the semen, so it affects fertility. Hormonal disorders, alteration of the peripheral nervous system. It helps to control sphincters. Erectile dysfunction.	CV3 (Zhongji): Exhaustion, urinary incontinence, male sterility, vulvar pruritus, uterine prolapse, prostatitis, amenorrhea, leucorrhoea, deviations from the uterus.
236	Prostate-Rectum	SIMILAR SYMPTOMATOLOGY: Papilloma. Virus. It causes warts (vaginal in women). If it is associated with leprosy, it produces fibroids, cysts appear, cancer, condylomas, itching, bleeding. It affects the reproductive organs.	CV3 (Zhongji): Exhaustion, urinary incontinence, male sterility, vulvar pruritus, uterine prolapse, prostatitis, amenorrhea, leucorrhoea, deviations from the uterus. GV2 (Yaoshu): Pain in the spine and thighs, anal eczema, stiffness to bend, hemorrhoids, pain in the sacrum and coccyx.
237	Pudendal-Pudendal	SIMILAR SYMPTOMATOLOGY: Paramyxoviridae. Virus. Parotitis (mumps), contagious, acute or chronic polyglandular viral disease, typical in children and young people. It affects other glands, the CNS, the testicles. It is complicated as meningitis or infertility due to inflammation. It affects the bladder.	LV12 (Jimai): Digestive disorders, adnexitis (ascending infection in the tubes and ovaries), epididymitis (inflammation and redness of the scrotum, may be due to excess activity).
238	Lung-Heart	SIMILAR SYMPTOMATOLOGY: KADO. Emotional. Sadness, basic emotion, deep or chronic decay.	BL42 (Pohu): It calms cough, dyspnea, acute and chronic bronchitis. Bronchial asthma. ST16 (Yingchuang): It reduces cough and relieves dyspnea. Respiratory diseases, mastitis. Insomnia, pulmonary congestion.
239	Pancreas tip-Spleen	SIMILAR SYMPTOMATOLOGY: Common wart. Virus. Papules that affect the face or hands. They have their own irrigation system and nerve endings that is why they hurt and bleed a lot (Do not remove). The ones that are already there do not disappear but the treatment prevents the appearance of more warts.	LV14 (Qimen): It decongests the liver and spleen, and harmonizes the stomach. Liver diseases, inflammation of the spleen. Abdominal distention, diseases after childbirth. LV13 (Zhangmen): Lack of energy. Low back pain, pain in the extremities and pain in the chest, cough, dyspnea, vomiting and anguish. Meteorism with intense radiated pain, vomiting and anguish.
240	Chiasma-Chiasma	SIMILAR SYMPTOMATOLOGY: LUCINA. Special. Cross-linking of optic nerves. It regulates the lymphatic flow of the organism. For patients with cancer. Brain weakness. It oxygenates. Alteration of balance. Bruising. Severe edema of arms and legs. Tired eyes.	GB6 (Xuanli): Lack of appetite. Anorexia, facial edema, gastritis, fever without sweat.
241	Radius-Radius	SIMILAR SYMPTOMATOLOGY: Microsporum. Fungus. Ringworm of the head, in children and adults with immunodeficiency. Dermatophytosis. Mouth,	PC4 (Ximen): Amnesia, rheumatic pain in the forearms, wrist and fingers, schizophrenia, cough, hemorrhages of the

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
		ear, eye, nose. It produces dandruff. Foot fungus. Bad axillary smell.	rectum, nose or stomach, hemorrhoids. Fear
242	Ischial ramus-Ischial ramus	SIMILAR SYMPTOMATOLOGY: Streptococcus C. Bacterium. Respiratory infections, diarrhea, skin infections. Obstructive process of the colon. Tonsillitis and impetigo. It affects the hip, tube and digestive organs. Diverticulosis. For raw egg yolk, cheeses, fermented foods, lactobacilli, etc.	BL36 (Chengfu): Neck, shoulder and back pain. Paralysis of legs, sciatica, torticollis.
243	Ramus-Ramus (of mandible)	SIMILAR SYMPTOMATOLOGY: Staphylococcus epidermidis. Bacterium. Part of the normal flora of the skin and mucous membranes. Responsible for skin infections. Skin problems on the face. It is confused with psoriasis.	ST5 (Daying): Dental neuralgia. Deviation of the mouth. Goiter.
244	Rectum-Rectum	SIMILAR SYMPTOMATOLOGY: Pseudomonas aeruginosa. Bacterium. It infects the pulmonary tract, urinary tract, wounds, tissues, pneumonia. It originates metastasis and tumor phenomena. It complicates the postoperative period. Problems in the skin Tuberculosis. It can go to the ear. Congenital intrauterine deformation. Hemorrhoids. Very aggressive. It simulates CA of rectum and uterus. Inflammation.	GV2 (Yaoshu): Pain in the spine and thighs, anal eczema, stiffness to bend, hemorrhoids, pain in the sacrum and coccyx.
245	Retro mastoid-Retro mastoid	SIMILAR SYMPTOMATOLOGY: Taenia solium. Parasite. Cysticercosis caused by the ingestion of parasite eggs when eating pork, fruits and vegetables poorly cooked or poorly washed; lack of hygiene after going to the toilet. It affects the CNS. Constant and strong headaches, disorientation, convulsions, loss of memory.	GB10 (Fubai): Meeting point of the SI and BL meridians. Cervical adenitis, tetraplegia, bronchitis, asthma, deafness, tinnitus, visual hallucinations, apnea, neck tumor.
246	Kidney-Renal capsule	SIMILAR SYMPTOMATOLOGY: Reservoir. Kidney dysfunction, urinary problems. Parasites can affect the feet, hands, buttocks, anogenital area, trunk, thighs, and legs. It is located in the intestines causing abdominal pain, nausea, anorexia and diarrhea, laryngeal obstruction. In people with weak immune system causes mild diarrhea. It is able to break through the intestinal epithelium and produce visceral larva migrans syndrome, in severe cases, invading other organs.	BL23 (Shenshu): Kidney settlement. It protects the kidney and regulates menstrual flow. It mobilizes and eliminates water. Disorders of male sexual dysfunction, irregular menstruation, urinary incontinence, and low back pain. BL50 (Weicang): It harmonizes the stomach and stimulates the digestion process. Acute gastroenteritis and digestive disorders.
247	Kidney- Posterior lobe of the liver	SIMILAR SYMPTOMATOLOGY: Special. Elimination of toxins.	BL50 (Weicang): It harmonizes the stomach and stimulates the digestion process. Acute gastroenteritis and digestive disorders. LV14 (Qimen): It decongests the liver and spleen, and harmonizes the stomach. Liver diseases, inflammation of the spleen. Abdominal distention, diseases after childbirth.
248	Kidney-Cheekbone	SIMILAR SYMPTOMATOLOGY: Plasmodium Vivax. Parasite. Malaria, night sweats, evening fever, hot flashes. It is	BL52 (Zhishi): It protects the kidney. It strengthens the essence and eliminates

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
		confused with arthritis or rheumatism. Nausea, vomiting and headaches, splenomegaly and hepatomegaly. It simulates fibromyalgia.	the heat. Male sexual disorders. Urinary tract infection. Low back pain. ST3 (Juliao) : Hemiplegia, facial paralysis, trigeminal neuralgia, stuttering, tonsillitis, torticollis, acne, glaucoma, rhinitis, eyelid tics.
249	Kidney-Kidney	SIMILAR SYMPTOMATOLOGY : Clostridium tetani. Bacterium . Tetanus. It originates metastasis and toxins that disrupt the CNS. Lumbar pain, hypertension, mental confusion, fever, acute catarrh, tiredness, edema. If toxins reach the brain, the danger of death becomes latent. Muscular contractures. It may cause seizures or spasms. Symptoms similar to Parkinson. Muscular rigidity (neck), tremors or spinal syndrome. It simulates gastroduodenal ulcer. By irons (cuts in skin) and bites of spiders or vipers.	BL52 (Zhishi) : It protects the kidney. It strengthens the essence and eliminates the heat. Male sexual disorders. Urinary tract infection. Low back pain.
250	Kidney-Sacrum	SIMILAR SYMPTOMATOLOGY : Olazo. Dysfunction . Intestinal noises, gas, flatulence. Corrects intestinal laziness.	BL52 (Zhishi) : It protects the kidney. It strengthens the essence and eliminates the heat. Male sexual disorders. Urinary tract infection. Low back pain. BL27 (Xiaochangshu) : SI point. It regulates intestinal transit and urination. Urinary and intestinal infections. Lumbago, sciatica, pain of the sacrum, constipation, hemorrhoids, urinary incontinence, metritis, urethritis, and spermatorrhea.
251	Left kidney-Left eye	SIMILAR SYMPTOMATOLOGY : Emotional . Fear of common things, social phobia. Person who is afraid of doing common things in front of other people such as eating, giving a speech, meeting new people. Fear of spiders, darkness, new things, etc.	BL52 (Zhishi) : It protects the kidney. It strengthens the essence and eliminates the heat. Male sexual disorders. Urinary tract infection. Low back pain. ST1 (Chengqi) : Meeting point with GB meridian. Myopia, conjunctivitis, facial paralysis, lacrimation, eyelid tics. It clears the heat and improves visual acuity.
252	Upper kidney-Lower kidney	SIMILAR SYMPTOMATOLOGY : Special . Immunodeficiency. Vulnerable to diseases.	BL52 (Zhishi) : It protects the kidney. It strengthens the essence and eliminates the heat. Male sexual disorders. Urinary tract infection. Low back pain. BL47 (Hunmen) : Mental weakness, action on the adrenal glands, back pain, nephritis, disc and digestive disorders, colitis. Special in genital problems.
253	Kidney-Temporal	SIMILAR SYMPTOMATOLOGY : GOIZ. Special . Scan both kidneys to know which one to impact. Psychosomatic disorders of the kidney.	BL52 (Zhishi) : It protects the kidney. It strengthens the essence and eliminates the heat. Male sexual disorders. Urinary tract infection. Low back pain. GB6 (Xuanli) : Lack of appetite. Anorexia, facial edema, gastritis, fever without sweat.
254	Left kidney-Thyroid	SIMILAR SYMPTOMATOLOGY : Emotional . Afraid of suffering an accident. Crisis of anguish related to objects or concrete situations, seeing blood or wounds, choking, disguised people, falling, etc.	BL23 (Shenshu) : Kidney settlement. It protects the kidney and regulates menstrual flow. It mobilizes and eliminates water. Disorders of male sexual dysfunction, irregular menstruation, urinary incontinence, and low back pain.

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
			CV22 (Tiantu): Hoarseness. Abscess in tonsils. Pharyngitis, laryngitis, asthma, dyspnea, all kinds of coughs.
255	Kidney-Ureter	SIMILAR SYMPTOMATOLOGY: Machín. Special. It is active when there is lithiasis or kidney grit that causes nephritic colic or menstrual colic in women. Cases of dysmenorrhea or abdominal traumas. Herpes 4 (skin and nasopharyngeal problems).	BL52 (Zhishi): It protects the kidney. It strengthens the essence and eliminates the heat. Male sexual disorders. Urinary tract infection. Low back pain. ST28 (Suidao): It regulates water, menstrual flow and calms pain. Urinary retention, constipation, dysmenorrhea, fertility disorders in women.
256	Patella-Patella	SIMILAR SYMPTOMATOLOGY: Emotional. Fear, unpleasant feeling provoked when perceiving real or imaginary danger, related to anxiety.	ST35 (Dub): Inflammation of the knee, poor mobility, edema of the leg due to wetness and pain in the knee. BL39 (Weiyang): Balance of Yang. Mobilizes water and moisture, as it is responsible for eliminating it. Regulates the Triple Burner (TB). Disorders of water balance and urination (retention, incontinence, etc.).
257	Douglas' pouch-Femoral vein	SIMILAR SYMPTOMATOLOGY: Norwalk. Virus. Norovirus. It causes gastroenteritis due to food poisoning. It affects all people and their immunity is temporary and incomplete. It may be confused with papilloma. It causes indefinite pain. It affects the pelvic cavity. Itching in the anus, bleeding and urethral tingling. It can associate with Pneumocystis Carinni or Candida, causing problems in the respiratory tract.	BL36 (Chengfu): It eliminates hemorrhoids and calms pain, decongests the meridian and its vessels and makes them permeable. Pain in the area of the buttocks, sacrum and thigh. BL27 (Xiaochangshu): SI point. It regulates intestinal transit and urination. Urinary and intestinal infections. Lumbago, sciatica, pain of the sacrum, constipation, hemorrhoids, urinary incontinence, metritis, urethritis, and spermatorrhea.
258	Sacrum-Sacrum	SIMILAR SYMPTOMATOLOGY: Proteus mirabilis. Bacterium. It alters the urine making it alkaline and with a strong fishy smell. It produces irritation and infection, injuries of the sacrum, infertility, and genital inflammation. It simulates pneumonia. Congenital-uterine deformation, pain under the back, weakness and pain in the legs. Muscle problems in movements and articulations of legs. It produces wound infections, septicemia and pneumonia.	GV2 (Yaoshu): Settling point of the lumbar region. Amenorrhea, urethritis, pain in the spine and thighs, anal eczema, stiffness to bend, epilepsy.
259	Atrioventricular sinus-Left kidney	SIMILAR SYMPTOMATOLOGY: ANA ALICIA. Special. Tachycardia and arrhythmias, syncopes, vagotonia (excessive stimulation of nerve fibers), rhinovirus (more than 110 different types that cause colds according to the season of the year), viral rhinitis (nasal inflammation). For aerosols, closed public places and dirty hands. Fatigue.	BL52 (Zhishi): It protects the kidney. It strengthens the essence and eliminates the heat. Male sexual disorders. Urinary tract infection. Low back pain. ST15 (Wuyi): It cleanses the lungs, clears the heat, calms the cough and relieves dyspnea. Respiratory tract infection (acute bronchitis, pneumonia, pulmonary abscess, etc.).
260	Frontal sinus-Frontal sinus	SIMILAR SYMPTOMATOLOGY: Rhinovirus. Virus. More than 110 different types that cause colds according to the season of the year. Viral rhinitis (nasal inflammation). For aerosols, closed public places and dirty hands. Fatigue. Infection and congestion of the paranasal sinuses. For	BL2 (Zanzhu): Sneezing, sinusitis, excitement or nervous depression, frontal headaches, conjunctivitis, lacrimation, insomnia, it improves visual acuity.

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
		upper respiratory infections, broken bones, depressed immune system.	
261	Nasal cavity-Nasal cavity	SIMILAR SYMPTOMATOLOGY: Viral sinusitis. Virus. Sinusitis, rhinitis, nasal flow, headaches, allergies, fever, maxillary problems.	BL1 (Jingming): Meeting point of the SI and ST meridians. Blepharitis, conjunctivitis, glaucoma and swollen eyes.
262	Right temple-Heart	SIMILAR SYMPTOMATOLOGY: Emotional. Sadness. Alteration in skin pigmentation. Point to start trance.	ST16 (Yingchuang): Cough with dyspnea and expectoration, diseases of the lung, respiratory tract. Chest pain. BL1 (Jingming): Blepharitis (inflammation of the eyelid), conjunctivitis, styes (inflammation of an eyelid gland), glaucoma, retinitis, swollen eyes.
263	Temple-Temple	SIMILAR SYMPTOMATOLOGY: Isaac. Special. Dysfunction of blood flow to the brain and lungs. Cerebral microcirculation and pulmonary emphysema, hypertension, headaches, degenerative problems secondary to respiratory diseases.	BL1 (Jingming): Blepharitis (inflammation of the eyelid), conjunctivitis, styes (inflammation of an eyelid gland), glaucoma, retinitis, swollen eyes.
264	Sigmoid-Rectum	SIMILAR SYMPTOMATOLOGY: R-40. Virus. Symptoms that involve knowledge, perception, emotional state and behavior. Virus related to tumors. Cutaneous manifestation, blackish hives, hair loss. It could occur in women diagnosed with the human papillomavirus. Lumbago, mucus, gas. It affects the rectum, vagina and pelvis. It causes digestive disorders such as diarrhea, rectal bleeding, bloating, abdominal distension, inflammation, hemorrhoids.	SP13 (Fushe): It regulates the intestine and the stomach. Bloating, edema, sensation of abdominal fullness, flatulence, external abdominal hernias, constipation, indigestion. CV2 (Qugu): Meeting point with LV. Lack of energy, impotence, urethritis, spermatorrhea, endometritis, and irregular menstrual cycles.
265	Subclavian-Subclavian	SIMILAR SYMPTOMATOLOGY: Corynebacterium. Bacterium. Diptherous bacillus found in the skin and mucosa of humans and animals, especially in the armpits (bad smell) and folds (forearm, legs, etc.). It may cause diphtheria (affecting angina, throat, nose, upper respiratory and digestive tract. It may also cause thickening of the neck). Chronic cough, tracheobronchial problems, diarrhea, general edema, swollen glands, fluid retention. It simulates asthma. You can it this pair to mature cheeses, in monosodium glutamate, soy sauce and yogurt.	SP21 (Dabao): Rhinitis, asthma, bronchitis, intercostal pain, pain in shoulders and arms. It purifies and decreases lung energy, calms cough and improves dyspnea. Lung and respiratory diseases.
266	Subdiaphragm-Subdiaphragm	SIMILAR SYMPTOMATOLOGY: ECUADOR. Reservoir. Parasites, larva of taenia (tapeworm that lodges in the intestines in people who eat meat), fever, malaise, muscle pain, brain problems, epilepsy, personality problems. For contaminated pork, strawberries, lettuce. Wash and disinfect fruits and vegetables. It causes seizures.	SP16 (Fuai): It strengthens the spleen and eliminates indigestion. Acute and chronic dysentery. Constipation.
267	Supraciliary-Medulla	SIMILAR SYMPTOMATOLOGY: VIVIAN. Special. Body integrity. There is alteration of the anatomical integrity due to loss or lack of a limb, an abortion or an unwanted pregnancy. Exaggerated growths of	GV15 (Yamen): Sudden loss of voice, epilepsy, rigidity of the tongue, unable to speak, epistaxis, headaches, psychosis, stiff neck, pharyngitis.

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
		any part of the body. People who feel the need to hurt or cut themselves, tear their hair, do not accept their body image (transgender, tattoos, piercings, makeup). Low self-esteem, physical alteration. It favors the acceptance in case of amputations, rapes, corporal abuse, bad body odor, consequences of accidents (by not agreeing with what happened). People who want to correct their body with prosthesis, obesity, etc.	GB14 (Yangbai): Meeting point of ST, LI and TB meridians. All diseases of the eyes, headaches, trigeminal neuralgia, eyelid tics, blurred vision.
268	Supraspinatus-Supraspinatus	SIMILAR SYMPTOMATOLOGY: Mycobacterium tuberculosis. Bacterium. It may cause diseases in any part of the body. The most common is a lung infection that spreads to other organs by blood and lymph. It detects kidney or gallbladder stones. Vaginitis, lice, nits, crabs.	LI16 (Jugu): Infantile convulsions, rheumatic disorders in arms and shoulders. Point of specific action on the marrow. Fever, headache, painful edema in the larynx and pharynx during the "cold", acute inflammation in the neck and head, hyper or hypo exaggerated sweating.
269	Suprahepatic-Suprahepatic	SIMILAR SYMPTOMATOLOGY: Clostridium malignum. Bacterium. It is part of the intestinal flora and cause diarrhea. It is present in colon cancer. It causes respiratory failure in lungs, cirrhosis and hepatitis in the liver. It simulates CA, factor of metastasis. It affects various organs, destroying them. Immunodeficiency.	SP21 (Dabao): Chest pain, problems of the stomach, liver and gallbladder.
270	Suprapubic-Suprapubic	SIMILAR SYMPTOMATOLOGY: HTLV3. Virus. Retrovirus (the virus looks for a disease). It causes many diseases including AIDS, cancer, leukemia, myelopathy. It affects the immune system. Itching in the genital area. Low back pain. It attacks the vagina and the urethra. Urinary stress incontinence, mainly in women.	SP13 (Fushe): Colitis, intestinal spasms, constipation, indigestion, abdominal tumors, hepatitis.
271	Adrenal-Lung	SIMILAR SYMPTOMATOLOGY: Pseudomonas aeruginosa. Bacterium. It infects lungs and urinary tract, blood, tissues, wounds, pneumonia. It simulates asthma. Hypertension.	GV8 (Jinsuo): It calms the spiritual strength and eliminates spasms. Psychic and psychosomatic disorders, fever, sedative and antispasmodic action. BL45 (Yixi): It calms cough and relieves dyspnea, soothes pain, chronic acute bronchitis, shoulder pain and back pain.
272	Adrenal-Rectum	SIMILAR SYMPTOMATOLOGY: Leptospira. Bacterium. It causes jaundice, hemorrhages, fever, chills, muscle pain. It is invasive and diffuses through the blood. For the urine of rats and dogs. Problems in the digestive tract and in the airways and mucous membranes. Meteorism, gases with smell. Intestinal inflammation. It produces bloody stools.	GV8 (Jinsuo): It calms the spiritual strength and eliminates spasms. Psychic and psychosomatic disorders, fever, sedative and antispasmodic action. GV2 (Yaoshu): Pain in the spine and thighs, anal eczema, stiffness to bend, hemorrhoids, pain in the sacrum and coccyx.
273	Adrenal-Adrenal	SIMILAR SYMPTOMATOLOGY: Dysfunction. It regulates the nervous system. Addison's disease (hypofunction or insufficiency that causes languor, general weakness, gastric irritability, it changes the color of the skin). Due to the use of corticosteroids, inability to respond to inflammations, traumas.	GV8 (Jinsuo): It calms the spiritual strength and eliminates spasms. Psychic and psychosomatic disorders, fever, sedative and antispasmodic action.

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
274	Adrenal-All the front	SIMILAR SYMPTOMATOLOGY: HSV, VSV, CSV. Virus. Controlled asthma. It is very rare to find it. Bronchitis, rheumatic fever. The adrenal glands are not making corticosteroids. Difficulty breathing caused by the contraction of the respiratory tract (bronchi). For fungi, surgeries, drugs that synthesize cortisol (ketoconazole), birth by caesarean section, and congenital diseases.	BL47 (Hunmen): Mental weakness, action on the adrenal glands, back pain, nephritis, disc and digestive disorders, colitis. Special in genital problems.
275	Right temporal-Right temporal	SIMILAR SYMPTOMATOLOGY: Rickettsia. Bacterium. Exanthematic typhus (set of infectious diseases caused by fleabites, lice, mites, ticks, high fever, insatiable thirst, chills, headache, and rash).	GB8 (Shuaigu): Meeting point with BL and SI meridians. Alcoholic rheumatism, heavy head, belching, hearing disorders, intoxications, optic atrophy.
276	Right temporal-Right temporal	BONILLA. Emotional. Extreme aggression with oneself or with others. Neuroses (criminals and suicides). Rage, sadism, anguish, anxiety, fear, autism, masochism, sadomasochism, cerebral trauma, thermoregulatory, hyperactivity.	GB8 (Shuaigu): Meeting point with BL and SI meridians. Alcoholic rheumatism, heavy head, belching, hearing disorders, intoxications, optic atrophy.
277	Right temporal-Left temporal	SIMILAR SYMPTOMATOLOGY: Exanthematic typhus. Virus. Insomnia, irritability, nervousness, fever, migraine, dizziness, mental confusion, rheumatism, muscle aches, photosensitivity, skin rash. It affects sight and causes psychological and behavioral changes. By fleas and rats.	GB8 (Shuaigu): Meeting point with BL and SI meridians. Alcoholic rheumatism, heavy head, belching, hearing disorders, intoxications, optic atrophy.
278	Left temporal-Left temporal	SIMILAR SYMPTOMATOLOGY: Polyomaviridae. Virus. It causes latent infections and is oncogenic. It produces multiple tumors when the immune system is incompetent. It relates to the skin CA. Sleep, balance and appetite disorders (anorexia and bulimia). Nervousness. It alters memory. Disorientation and confusion.	GB8 (Shuaigu): Meeting point with BL and SI meridians. Alcoholic rheumatism, heavy head, belching, hearing disorders, intoxications, optic atrophy.
279	Right triceps tendon-Right achilles	SIMILAR SYMPTOMATOLOGY: Special. It increases vital energy and avoids or decreases healing crises.	TB12 (Xiaolou): Pain in the neck and shoulders, headaches. It makes the meridian passable. It calms the pain. BL60 (Kunlun): Mountain of Tibet. Nervous pains, sore and swollen feet, sciatica, pain in legs, neck and head, asthma, cough, pneumonia, dizziness, eye pain.
280	Tensor fasciae latae-Tensor fasciae latae	SIMILAR SYMPTOMATOLOGY: Gardnerella vaginalis. Bacterium. It is part of the vaginal flora. It remains asymptomatic until there is an imbalance causing vaginal infections, strong odor, thick vaginal discharge, itching and vaginal irritation, painful sexual intercourse, painful urination, pain in the belly, urinary incontinence. It causes rectal problems in men.	GB30 (Huantiao): Meeting point with BL. Flaccid paralysis of the legs, back, thigh and knee pain. Sciatica. Joint pain of hip, thigh and calves, epilepsy, action on abscesses, hemiplegia, action on thyroid. BL52 (Zhishi): It protects the kidney. It strengthens the essence and eliminates the heat. Male sexual disorders. Urinary tract infection. Low back pain.
281	Testicle-Testicle	SIMILAR SYMPTOMATOLOGY: Yersinia pestis. Bacterium. Abrupt presentation of fever, chills, headache, generalized pain, weakness, nausea and vomiting, cough (dry) similar to bronchitis,	CV2 (Qugu): It favors the formation of urine, regulates menstrual flow and calms pain. Urinary tract diseases, incontinence, gynecological disorders, male sexual disorders.

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
		with vaginal discharge in women and azoospermia in men. Sterility, low testosterone, low back pain, premature ejaculation, problems in the larynx, testicles and pelvis.	
282	Tibia-Tibia	SIMILAR SYMPTOMATOLOGY: Malassezia furfur. Fungus. Species of fungus that is part of the normal flora of the skin. It causes a non-contagious infection called Pityriasis versicolor (light or dark spots with scaling, inflammation and minimal irritation, common on coasts and hot places). It simulates scarlet fever or psoriasis. It causes ulcers, bruises or discoloration. It is more common in women and diabetics.	BL56 (Chengjin): Lumbosciatica, hemorrhoids, diarrhea, inflammation of the armpit, muscular atony, arteritis of the lower limb, congestion, intermittent claudication (pain relieved after exercise, amputation due to gangrene is required).
283	Lower tibia-Lower tibia	SIMILAR SYMPTOMATOLOGY: Mycosis. Fungus. Infection that causes redness, spots, itching, peeling, irritation and skin cracking. Mycosis of the hair. Thick and coarse hair.	SP6 (Sanyinjiao): Crossing with the meridians of KI, LV and SP. For elderly people without energy. Urinary incontinence, heavy menstruation, varicose ulcers, genital disorders in women, dislocation of the maxilla, pain in the penis or clitoris, swelling of the feet, hemiplegia, neurasthenia.
284	Thymus-Spleen	SIMILAR SYMPTOMATOLOGY: When breathing is difficult by COPD.	CV17 (Tanzhong): TB alarm point, secondary vessels connect it with HE, SI, KI, PC, TB, LV, LU, LI and SP. Energetic disorders due to excess or lack, mastitis, cough, nocturnal asthma, hiccups. LV14 (Qimen): All post-partum infections. Febrile condition, chest pain, neurasthenia, stomachache, diarrhea, bloating, poor eye coordination, pleurisy, distention.
285	Thymus-Spleen	SIMILAR SYMPTOMATOLOGY: MARCO ANTONIO. Special. COPD (Chronic Obstructive Pulmonary Emphysema: asthma or emphysema). Polyglobulia, lack of air. It eliminates phlegm. Excess of red blood cells. It regulates hematocrit. Anemia. It eliminates phlegm.	CV17 (Tanzhong): TB alarm point, secondary vessels connect it with HE, SI, KI, PC, TB, LV, LU, LI and SP. Energetic disorders due to excess or lack, mastitis, cough, nocturnal asthma, hiccups. LV14 (Qimen): All post-partum infections. Febrile condition, chest pain, neurasthenia, stomachache, diarrhea, bloating, poor eye coordination, pleurisy, distention.
286	Thymus-Liver	SIMILAR SYMPTOMATOLOGY: Escherichia coli. Bacterium. Hepatitis L (lupus hepatitis, hepatocellular necrosis, inflammation with fibrosis that degenerates into cirrhosis or liver failure, it is known as autoimmune hepatitis). E. Coli is necessary for the proper functioning of the digestive process and the production of vitamins B and K.	CV16 (Shongting): Nausea, vomiting, thoracic fullness, pulmonary congestion, dyspnea, pleurisy, dysphagia, asthma. LV14 (Qimen): All post-partum infections. Febrile condition, chest pain, neurasthenia, stomachache, diarrhea, bloating, poor eye coordination, pleurisy, distention.
287	Thymus-Hypophysis	SIMILAR SYMPTOMATOLOGY: Emotional. Greed, excessive desire for riches, pleasures or possessions, without treasuring them.	CV16 (Shongting): Nausea, vomiting, thoracic fullness, pulmonary congestion, dyspnea, pleurisy, dysphagia, asthma. GB14 (Yangbai): Meeting point of ST, LI and TB meridians. All diseases of the eyes, headaches, trigeminal neuralgia, eyelid tics, blurred vision.

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
288	Thymus-Ovary	SIMILAR SYMPTOMATOLOGY: Emotional. Impatience, anxiety, and uneasiness about something that is expected or desired.	CV16 (Shongting): Nausea, vomiting, thoracic fullness, pulmonary congestion, dyspnea, pleurisy, dysphagia, asthma. CV2 (Qugu): Meeting point with LV. Lack of energy, impotence, urethritis, spermatorrhea, endometritis, and irregular menstrual cycles.
289	Thymus-Parietal	SIMILAR SYMPTOMATOLOGY: Rubella. Virus. Rubivirus that is transmitted by sneezing, coughing or contact with contaminated areas such as glasses, handkerchiefs, hands, etc.), reddish spots, malaise like flu, headache and joints, fatigue, red eyes, pharyngitis, swollen glands around the nape of the neck and behind the ears. It may alter pregnancy.	CV16 (Shongting): Nausea, vomiting, thoracic fullness, pulmonary congestion, dyspnea, pleurisy, dysphagia, asthma. GB19 (Naokong): Tiredness, rhinitis, sinusitis, photophobia, thinness, and headache with palpitations, torticollis, and shoulder and neck pain, flu-like states.
290	Thymus-Rectum	SIMILAR SYMPTOMATOLOGY: HIV. Virus. It raises the immune system. It increases the production of CD3, CD4, CD8 and T4. Right knee pain. Insomnia, nightmares.	CV16 (Shongting): Nausea, vomiting, thoracic fullness, pulmonary congestion, dyspnea, pleurisy, dysphagia, asthma. GV1 (Changqiang): Meeting point with KI, BL, GB, LV and CV. Constipation, fear, epilepsy, madness, rectal prolapse, constipation, premature ejaculation.
291	Thymus-Adrenal	SIMILAR SYMPTOMATOLOGY: ALVARO. Special. Adrenal dysfunction. It corrects hormonal dysfunction. It may be due to iatrogenia. It regulates the number of red blood cells. It is common in women with menopause. Intestinal occlusion. It harmonizes glands and hormone production.	CV16 (Shongting): Nausea, vomiting, thoracic fullness, pulmonary congestion, dyspnea, pleurisy, dysphagia, asthma. GV6 (Jizhong): Psychosis, spinal pain, rectal prolapse, jaundice, scoliosis, hemorrhoids and epilepsy.
292	Thymus-Thymus	SIMILAR SYMPTOMATOLOGY: Dysfunction. Glandular dysfunction. It governs the production of lymphocytes. Disorders of the lymphatic system. When it fails, immunodeficiency occurs. It affects the movement.	CV16 (Shongting): Nausea, vomiting, thoracic fullness, pulmonary congestion, dyspnea, pleurisy, dysphagia, asthma.
293	Thyroid-Thyroid	SIMILAR SYMPTOMATOLOGY: Dysfunction. Hyper or hypothyroidism causing hypertension, high cholesterol, arrhythmias and osteoporosis. Problems with the metabolism, cold intolerance, weight loss, tremor in the hands, goiter (enlargement of the thyroid). Obesity. Retention of liquids. Depression. It might be confused from candidiasis to hypoglycemia or food intolerances.	CV22 (Tiantu): Hoarseness. Abscess in tonsils. Pharyngitis, laryngitis, asthma, dyspnea, all kinds of coughs.
294	Trachea-Trachea	SIMILAR SYMPTOMATOLOGY: Influenza. Virus. Eye irritation, oropharyngeal congestion, reddening of the skin (face), lymph nodes.	CV20 (Huagai): Tonsillitis, peritonsillar abscess, spasms of the esophagus, pharyngitis.
295	Greater trochanter-Contralateral kidney	SIMILAR SYMPTOMATOLOGY: Low back pain. Special. Pain that appears now by accident, by effort, bad posture, cooling. General discomfort, acute back pain without radiculitis, compression and radicular entrapment, neurogenic (nervous muscle pain). Overweight, herniated disc, digestive	GB30 (Huantiao): Flaccid paralysis of the legs, back, thigh and knee pain. Sciatica. Joint pain of hip, thigh and calves, epilepsy, action on abscesses, hemiplegia, action on thyroid. BL50 (Weicang): It harmonizes the stomach and stimulates the digestion

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
		disorders, excess meat and sugars, fever, headache, sunken eyes, weakness.	process. Acute gastroenteritis and digestive disorders.
296	Greater trochanter- Greater trochanter	SIMILAR SYMPTOMATOLOGY: Paratyphoid. Bacterium. Gastrointestinal disorders. It causes diarrhea, abdominal pain, vomiting and nausea that last approximately 7 days. Fatigue. It simulates arthritis. It is very similar to diabetes mellitus. Back pain. Avoid dehydration.	GB30 (Huantiao): Flaccid paralysis of the legs, back, thigh and knee pain. Sciatica. Joint pain of hip, thigh and calves, epilepsy, action on abscesses, hemiplegia, action on thyroid.
297	Lesser trochanter- Lesser trochanter	SIMILAR SYMPTOMATOLOGY: HIV 4. Virus. Retrovirus without immunodeficiency, related to leukemia and lymphoma, it does not cause them but relates to them. It worsens by opportunistic injections. Irritation in the urethra and genitals, vaginitis, irritation and anal inflammation, damage by allopathic medicines.	LV11 (Yinlian): Special point for sterility.
298	Fallopian tube-Ovary	SIMILAR SYMPTOMATOLOGY: PATY. Special. It identifies extra uterine pregnancy. Do not impact it if the woman is pregnant. Negative above right, positive below left.	SP13 (Fushe): Meeting point with LV meridian. Colitis and intestinal spasms, constipation, indigestion, abdominal tumors, hepatitis. SP14 (Fujie): Local point to treat abdominal disorders; cough with dyspnea, heavy perspiration, diarrhea, weakness in the legs, and atony of genitals.
299	Fallopian tube- Fallopian tube	SIMILAR SYMPTOMATOLOGY: Parvovirus. Virus. Viral disease that affects dog puppies causing frequent vomiting, decay, severe diarrhea. It attacks more women than men. Bleeding. It causes endometriosis if it goes to the pelvic cavity, myomas if it goes to the uterus. It may favor ectopic pregnancy. Infertility, irritability. Low back pain.	SP13 (Fushe): Meeting point with LV meridian. Colitis and intestinal spasms, constipation, indigestion, abdominal tumors, hepatitis.
300	Ureter-Ureter	SIMILAR SYMPTOMATOLOGY: Chickenpox. Virus. Herpes Virus. It is produced in lymph nodes, vesicles in the skin that affect the mouth, ear canal and vulva that later become crusted. Scratch injuries and skin infections. Fever, headache, malaise, loss of appetite or vomiting. If the immune system is weak, it worsens by opportunistic infections.	SP12 (Chongmen): Abdominal pain, leucorrhea, bloating, and hernia. Canine. It affects puppies. It is less severe than parvovirus, and it causes anorexia, increased temperature, tremor, diarrhea with blood, mucus and bad smell, vomiting, dehydration, lack of appetite, abdominal pain.
301	Urethra-Urethra	SIMILAR SYMPTOMATOLOGY: Coronavirus. Virus. Found mainly in children and in the elderly causing acute respiratory diseases in winters.	CV2 (Qugu): Meeting point with LV. Lack of energy, impotence, urethritis, spermatorrhea, endometritis, and irregular menstrual cycles.
302	Uterus-Ovary	SIMILAR SYMPTOMATOLOGY: DURAN. Special pregnancy. It indicates pregnancy. DO NOT IMPACT (Caution). Negative in the uterus and positive in the ovary.	CV2 (Qugu): Meeting point with LV. Lack of energy, impotence, urethritis, spermatorrhea, endometritis, and irregular menstrual cycles. KI11 (Henggu): Strong lumbar pain, weakness, swelling of the eyes, sexual impotence, frigidity, pelvic pain, and vaginismus.

FIRST LIST OF BASIC PAIRS

NO.	LOCATION	CHARACTERISTICS OF BIOMAGNETISM	CHARACTERISTICS OF TRADITIONAL CHINESE MEDICINE
303	Uterus-Rectum	SIMILAR SYMPTOMATOLOGY: Special. Intolerance to food.	GV2 (Yaoshu): Pain in the spine and thighs, anal eczema, stiffness to bend, hemorrhoids, pain in the sacrum and coccyx. CV1 (Huiyin): Anuria (scanty or no urine), weakness, hemorrhoids, anal itching, liver, head, diseases of the genitals, premature ejaculation.
304	Uterus-Kidney	SIMILAR SYMPTOMATOLOGY: Papilloma. Virus. Special. HPV, abscesses and polyps, cervical cancer, condyloma and warts in the vagina.	CV2 (Qugu): Meeting point with LV. Lack of energy, impotence, urethritis, spermatorrhea, endometritis, and irregular menstrual cycles. BL23 (Shenshu): Kidney settlement. It protects the kidney and regulates menstrual flow. It mobilizes and eliminates water. Disorders of male sexual dysfunction, irregular menstruation, urinary incontinence, and low back pain.
305	Uterus-Uterus	SIMILAR SYMPTOMATOLOGY: ROBERTA. Special. It simulates pregnancy. Bulimia, uterine infection. It may be due to the presence of parasites in the uterus (Ascaris lumbricoides, taenia, saginata, pinworms, etc.). Amenorrhea. Growth of the uterus. Infertility.	CV2 (Qugu): Meeting point with LV. Lack of energy, impotence, urethritis, spermatorrhea, endometritis, and irregular menstrual cycles.
306	Vagina-Vagina	SIMILAR SYMPTOMATOLOGY: Yersinia pestis. Bacterium. Abrupt presentation of fever, chills, headache, generalized pain, weakness, nausea and vomiting, cough (dry) similar to bronchitis, with vaginal discharge in women and azoospermia in men. Sterility, low testosterone, low back pain, premature ejaculation, problems in the larynx, testicles and pelvis. It simulates diabetes.	CV2 (Qugu): Meeting point with LV. Lack of energy, impotence, urethritis, spermatorrhea, endometritis, and irregular menstrual cycles.
307	Vagina-Throat	SIMILAR SYMPTOMATOLOGY: Staphylococcus aureus. Bacterium. Vaginal infections. It simulates pneumonia. It causes from skin infections to life-threatening diseases such as cellulitis, abscesses, osteomyelitis, and digestive problems.	CV2 (Qugu): Meeting point with LV. Lack of energy, impotence, urethritis, spermatorrhea, endometritis, and irregular menstrual cycles. CV23 (Lianquan): Meeting point with SP meridian. Abscess in the floor of the mouth, cough, bronchitis, dysphonia, sialorrhea, difficulty in swallowing, sublingual edema, speech disorders after stroke. It decongests the tongue and larynx.
308	Vagus nerve-Contralateral kidney	SIMILAR SYMPTOMATOLOGY: Universal reservoir. There may be fungi, parasites, viruses or bacteria. It regenerates the nervous system. Scan everything again after impacting it. Place Thymus-Rectum / Index.	LI18 (Futu): Paralysis or spasms in the face, neuralgia of the upper teeth. BL47 (Hunmen): Dysfunction of the gastrointestinal system and disorders of the respiratory system.
309	Ileocecal valve-Right kidney	SIMILAR SYMPTOMATOLOGY: Trichomonas. Bacterium. By sexual relations.	SP12 (Chongmen): Altered urination, cystitis, orchitis, metritis, spasm in the stomach. BL52 (Zhishu): Dysfunctions of the urogenital system, psychopathic disorders of the kidney.

310	Bladder-Bladder	SIMILAR SYMPTOMATOLOGY: Dysfunction. Renal problems. Dermatitis. Infected bladder (inflamed), it contracts and forces frequent urination. In children enuresis and nycturia and in adults cystitis, urethritis, hematuria, incontinence or polyuria, proteinuria, dysuria. Psoriasis. Scarlet fever. Sphincter control. Pain in lower back and pleura. Simulates gastroduodenal ulcer. For urine of cats and dogs.	CV2 (Qugu): Meeting point with LV. Lack of energy, impotence, urethritis, spermatorrhea, endometritis, and irregular menstrual cycles.
311	Gallbladder-Right kidney	SIMILAR SYMPTOMATOLOGY: Rhinovirus. Virus. Common cold. HIV can hide there. It produces renal dysfunction and causes syndromes related to renal function. Sinusitis. It may look like common Dengue. Runny nose. Congestion.	GB24 (Riyue): Meeting point with the SP meridian. Feeling of heat in the lower belly, hepatitis, nocturnal acid vomiting, depressive states or agitation. All stomach conditions. BL23 (Shenshu): Kidney settlement. It protects the kidney and regulates menstrual flow. It mobilizes and eliminates water. Disorders of male sexual dysfunction, irregular menstruation, urinary incontinence, and low back pain.
312	Gallbladder-Gallbladder	SIMILAR SYMPTOMATOLOGY: PRADA. Reservoir of virus. It causes warts (vaginal in women). It produces myomas if it is associated with leprosy. Cysts appear. Cancer. Condyloma, pruritus, bleeding. It affects reproductive organs.	GB24 (Riyue): Meeting point with the SP meridian. Feeling of heat in the lower belly, hepatitis, nocturnal acid vomiting, depressive states or agitation. All stomach conditions.
313	Prostate-Prostate	SIMILAR SYMPTOMATOLOGY: Papilloma. Virus. It causes warts (vaginal in women). If it is associated with leprosy, it produces fibroids, cysts appear, cancer, condylomas, itching, bleeding. It affects the reproductive organs.	CV3 (Zhongji): Exhaustion, urinary incontinence, male sterility, vulvar pruritus, uterine prolapse, prostatitis, amenorrhea, leucorrhoea, deviations from the uterus. GV2 (Yaoshu): Pain in the spine and thighs, anal eczema, stiffness to bend, hemorrhoids, pain in the sacrum and coccyx.
314	Medulla-Cerebellum	SIMILAR SYMPTOMATOLOGY: Newcastle. Virus. Problems of balance, position, coordination, etc. Ataxia, dizziness, aggressive behavior, dysarthria, uncoordinated sudden movements, nystagmus, ventilatory insufficiency. For eating chicken meat (excessively or badly cooked).	GV17 (Naohu): It clarifies the brain and awakens the senses. It helps the liver. Psychic and psychosomatic disorders. Hypertension. BL9 (Yuzhen): Headache, eye pain, myopia, nasal obstruction.
315	Bursa-Elbow	SIMILAR SYMPTOMATOLOGY: Streptococcus B. Bacterium. Pains in arms, shoulders, wrists. Inflammation of the carpal tunnel.	PC2: (Tianquan): Rheumatic disorders of the arm, palpitations, eyestrain, nausea, depression. SI8 (Xiaohai): Algas of the elbow, deafness, weak vision, arthritis of the elbow, shoulder, arm and neck. Acne of the chin, spasms, tics, diarrhea, abdominal pain, dementia.
316	Diaphragm-Esophagus	SIMILAR SYMPTOMATOLOGY: Histoplasma capsulatum. Fungus. Acquired by spores in the soil and air, by the excrement of infected birds.	ST18 (Rugen): Cough with dyspnea, chest pain, cold extremities, mastitis, and bulimia. GV17 (Naohu): It expands the thorax. It orders energy, calms pain and relieves dyspnea. Bronchial asthma, poor milk production, spastic bronchitis.

317	Hypophysis-Thyroid	SIMILAR SYMPTOMATOLOGY: Dengue. Virus. Common dengue. Pain in joints, head and muscles, flu with a lot of mucus. Cold. It simulates false influenza. It simulates Alzheimer's and rheumatism. Dizziness, fatigue, intense chest pain. By mosquito bite.	GV24 (Shenting): Nasal polyps, insomnia, epilepsy, eye inflammations, and rhinitis. Excitement (hyperactivity). CV3 (Zhongji): Exhaustion, urinary incontinence, male sterility, vulvar pruritus, uterine prolapse, prostatitis, amenorrhea, leucorrhoea, deviations from the uterus.
318	Liver-Medulla	SIMILAR SYMPTOMATOLOGY: Dysfunction. Galactorrhea (milk secretion outside lactation period). Trauma due to accidental blow to the head.	GV24 (Shenting): Nasal polyps, insomnia, epilepsy, eye inflammations, and rhinitis. Excitement (hyperactivity).
319	Palm-Palm	SIMILAR SYMPTOMATOLOGY: Plasmodium Vivax. Parasite. Intermittent fever, chills, headache, pain in the trunk and limbs. Person who falls asleep and feels good afterwards. It alters the liver. Bone pain, digestive problems. By mosquito bite.	PC8 (Laogong): It tones up sexual organs and the meridian Yin. Fatigue, epistaxis, cough, asthma, writer's cramp, pain in the hand and fingers, shyness.
